## 1 INTRODUCTION

### 1.1 The Scheme and the Applicant

1.1.1 This Statement of Reasons (the Statement) relates to an application made by Highways England (the Applicant) to the Planning Inspectorate (the Inspectorate) acting on behalf of the Secretary of State for Transport, under Section 37 of the Planning Act 2008 as amended (the Act).

1.1.2 The application is for the A585 Windy Harbour to Skippool Improvement Scheme (the Scheme) Development Consent Order (DCO) which would grant powers to alter and improve the existing A585 between Little Singleton and Skippool and construct a new carriageway which would follow a different alignment with a speed limit in excess of 50 miles per hour on an area in excess of 12.5 hectares. A description of the Scheme is contained in Chapter 2 of the Environmental Statement (document reference TR010035/APP/6.2).

1.1.3 The National Policy Statement for National Networks (NPS NN) was designated by the Secretary of State for Transport on 14 January 2015. The NPS NN states that the Government's strategic policy objective is to deliver improvements in capacity, connectivity and resilience on the road network to support a prosperous and competitive economy and to improve overall quality of life. This is reflected in the Scheme objectives which are:

- Reduce congestion on the existing A585 through Little Singleton Junction, Shard Junction and Skippool Junction
- Reduce severance and improve access across the A585 between Little Singleton and Skippool Junctions
- Improve connectivity and community cohesion
- Making the A585 route safer by reducing conflicts between users
- Improve journey time reliability by reducing congestion
- Deliver capacity enhancements to the strategic road network (SRN) whilst supporting the use of sustainable modes
- Support employment and residential/commercial development and growth opportunities
- Support the removal of obstacles to economic growth potential in both Wyre and Fylde
- Reduce/minimise the impact on the wider environment particularly for air quality and noise
- Complement and realise the full benefits of other Operations Directorate schemes in the region

1.1.4 The Scheme is a Nationally Significant Infrastructure Project (NSIP) within Section 14(1)(h) of the Act, specifically the Scheme is considered to be a construction NSIP. This is because the proposed Scheme involves "construction of a highway wholly within England" (Section 22(1)(a) and 22(2)(a)) for which the Secretary of State is the highway authority (Section 22(2)(b) of the Act). This highway is not a motorway

but is a highway where the speed limit is over 50 miles per hour. The relevant threshold is therefore the one set at section 22(4)(b), namely that the area of the Scheme (the area of land on which the highway to be constructed is situated, together with adjoining land expected to be used in connection with the alteration) must be over 12.5 hectares. For further information regarding how the Scheme qualifies as an NSIP, refer to the Explanatory Memorandum (document reference TR010035/APP/3.2).

- 1.1.5 As the Scheme is an NSIP, development consent must be obtained from the Secretary of State for Transport to authorise it, and an application for a DCO must be made to the Secretary of State, care of the Inspectorate, under Section 37 of the Act.

## 1.2 Purpose of the Statement of Reasons

- 1.2.1 This Statement has been prepared to comply with the requirements of Regulation 5(2)(h) of the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009 as amended (the APFP Regulations) and with regard to the Planning Act 2008: Guidance related to procedures for compulsory acquisition of land produced by the Department for Communities and Local Government dated September 2013 (the DCLG Guidance). This Statement is required because the DCO, if made, would confer upon the Applicant compulsory acquisition powers described in this Statement, including the power to acquire land outright, the power to acquire rights over land, the power to extinguish rights over land, and the power to occupy land temporarily for construction and maintenance purposes.

- 1.2.2 This Statement forms part of a suite of documents accompanying the application submitted in accordance with Section 55 of the Act and Regulation 5 of the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009. In particular, the Applicant has submitted the following documents which relate to the compulsory acquisition and temporary possession powers sought to enable delivery of the Scheme:

- this Statement
- the draft DCO (document reference TR010035/APP/3.1)
- the Explanatory Memorandum (document reference TR010043/APP/3.2)
- a statement to explain how the Scheme will be funded (the Funding Statement) (document reference TR010035/APP/4.2)
- plans showing the extent of land over which it is proposed to exercise compulsory powers and temporary possession (the Land Plans) (document reference TR010035/APP/2.2)
- a Book of Reference (BoR) containing details of the Land subject to compulsory acquisition and temporary possession, including the names and addresses of all known parties who may have an interest in the Land and be affected by the proposed acquisition (document reference TR010035/APP/4.3).
- Works Plans (document reference TR010035/APP/2.3) Planning Statement and National Policy Accordance (document reference TR010035/APP/7.1)

- 1.2.3 The Land to which this Statement relates is the Land which is proposed to be subject to the compulsory acquisition powers that are sought in the DCO (the Land). The Land is shown on the Land Plans (document reference TR010035/APP/2.2) and the works for which the Land is required are shown on the Works Plans (document reference TR010035/APP/2.3). In addition to the information provided in this Statement, short textual descriptions of each numbered plot shown on the Land Plans (document reference TR010035/APP/2.2), together with details of ownership, are set out in the BoR (document reference TR010035/APP/4.3).
- 1.2.4 This Statement sets out the reasons for the inclusion of compulsory powers within the DCO. It explains that it is necessary to include compulsory acquisition powers within the DCO so that the Applicant can acquire the land interests required for the construction and maintenance of the Scheme which are not already in its possession. It also explains why compulsory powers are necessary to enable the Applicant to use land temporarily and acquire, suspend, interfere with or extinguish rights over land in order to be able to construct and maintain the Scheme.
- 1.2.5 The Applicant is satisfied that the powers of compulsory acquisition and temporary possession sought in the DCO are necessary, proportionate and justified. The Applicant is further satisfied that the powers sought are in accordance with all relevant statutory and policy guidance. The Applicant considers that, given the benefits of the Scheme as set out in this Statement, there is a compelling case in the public interest for the compulsory acquisition and temporary possession powers sought.

## **2 THE SCHEME**

### **2.1 Introduction**

2.1.1 This section of the Statement provides details of the need for the Scheme and the benefits it will provide. A summary description is provided of the main Scheme works.

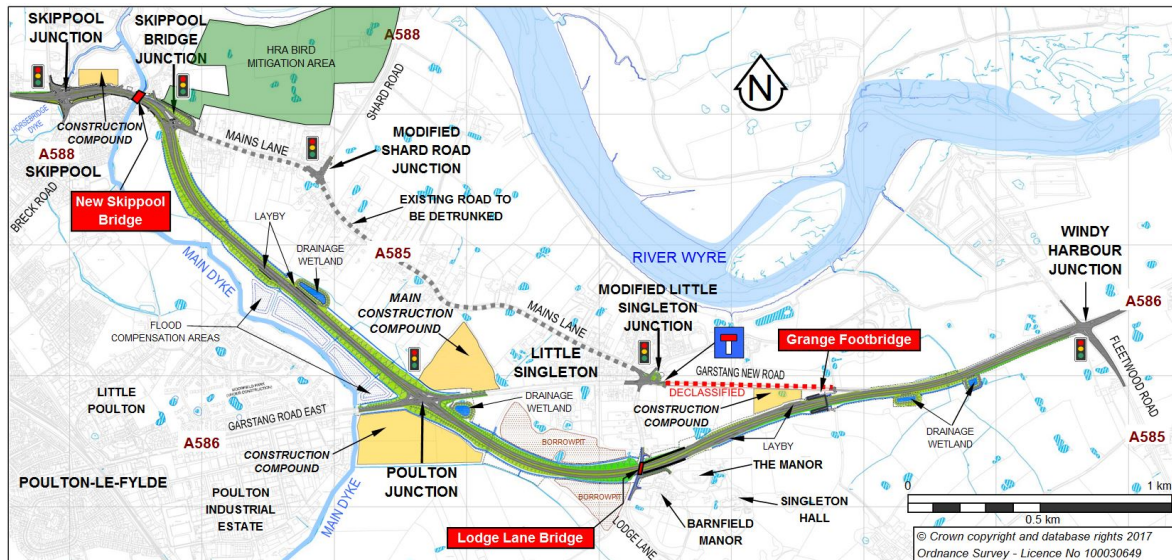

### **2.2 Description of the Scheme**

2.2.1 Chapter 2 of the Environmental Statement (document reference TR010035/APP/6.2) provides a detailed description of the Scheme.

2.2.2 The general arrangement of the Scheme is shown on document 2.5 (document reference TR010035/APP/2.5). The Scheme consists of:

- A 4.85km (3 miles) long dual 2-lane carriageway bypass from Windy Harbour Junction to the Skippool Junction.
- Four new junctions including: conversion of Skippool Junction to a traffic signal-controlled crossroads with A588 Breck Road and B5412 Skippool Road; Skippool Bridge Junction in the form of a three-arm traffic signal-controlled junction with the existing Mains Lane; Poulton Junction in the form of a signal-controlled crossroads connecting the new bypass to A586 Garstang Road East and modification to Little Singleton Junction (also known as Five Lane Ends) to accommodate U-turning traffic including buses. Between Skippool Bridge Junction and Poulton Junction the bypass is on embankment. East of Poulton Junction through to east of Lodge Lane the bypass is mostly in cutting.
- Three new major structures comprising: replacement of Skippool Bridge; Lodge Lane Bridge and Grange Footbridge.
- Alterations to the existing road network on completion of the bypass include: detrunking the A585 between Skippool Bridge Junction and the end of Garstang New Road east of Little Singleton; applying a reduction in speed limit to 30mph and providing a combined footway/cycleway along Mains Lane between Shard Road Junction and Little Singleton; altering Garstang New Road east of Little Singleton to allow restricted access to farmers' fields and provide a shared footway/cycleway route between Windy Harbour Junction and Little Singleton; applying a reduced speed limit of 30mph along Garstang Road East between the proposed Poulton Junction and Little Singleton and upgrading the lighting along Mains Lane and Garstang Road East.

## Insert 2-1 Description of the Scheme - The Scheme

- 2.2.3 The purpose of the Scheme is to address longstanding issues of congestion, reliability, access for vulnerable users and safety associated with the strategic A585 route between the Windy Harbour junction and Skippool junction. Refer to section 5 “The case for compulsory acquisition” for justification of the scheme.
- 2.2.4 There are many factors that presently reduce journey time reliability which include congestion on the existing A585 through Little Singleton, Shard Junction and Skippool Junction (particularly severe at the signalised junction with the A586 at Little Singleton and the A588 at Shard Road), long term traffic growth and accidents.
- 2.2.5 The South Pennines Route Based Strategy produced in April 2014 identified the need for improvements to the A585. The Scheme was included within the 2015-2020 Road Investment Strategy (RIS1) (Department of Transport, 2015) and is currently being delivered by Highways England. As outlined in the Introduction to the Application (document reference TR010035/APP/1.3) if consent is granted scheme construction would commence in Spring 2020.
- 2.2.6 Without the Scheme, traffic will continue to grow and the congestion in the area will continue to encourage rat-running traffic. The A585 bypass link will remove approximately 90% of the traffic from the existing A585 from the Little Singleton junction to Shard Road and will alleviate congestion along the A588 in north-east Poulton-le-Fylde. Refer to paragraph 1.1.3 for further details on the benefits the scheme will introduce.
- 2.2.7 The Scheme is currently predicted to reduce the end to end journey time between the Windy Harbour junction and the Skippool junction by a minimum of two minutes and fourteen seconds to a maximum of over four minutes in the opening year of 2022. The major impact in the journey time savings is between Little Singleton and Windy Harbour junction with a reduction of 11-31% in 2022, 11-30% in 2037 and 11-40% in 2051.

## 2.3 **The Authorised Works**

2.3.1 The works required for the delivery of the Scheme, including any associated development, are set out in Schedule 1 of the DCO and are referred to as the authorised development. In connection with the works listed in Schedule 1 to the DCO, the DCO would also authorise further development within the limits of land to be acquired or used permanently or temporarily (the order limits). For further details please refer to the DCO (document reference TR010035/APP/3.1) and the works plans (document reference TR010035/APP/2.3).

## 2.4 **Construction programme**

2.4.1 The construction of the Scheme would be programmed to take approximately 2 years to complete starting in Spring 2020 and finishing in Summer 2022.

2.4.2 Environmental surveys and mitigation measures would be carried out prior to starting construction works.

2.4.3 Some seasonally dependant services diversions may also be carried out prior to starting the construction works.

2.4.4 Following completion of the bypass, allowing traffic to be diverted from the existing road network, alterations would be carried out on the section of road that is to be de-trunked including alterations to Shard Road traffic signals junction and Little Singleton traffic signals junction.

### **3 COMPULSORY ACQUISITION**

#### **3.1 Scope of Compulsory Acquisition Powers Sought**

3.1.1 The scope of the compulsory acquisition powers sought by the Applicant is set out in full in Part 5 of the DCO (document reference TR010035/APP/3.1).

#### **3.2 Main Compulsory Acquisition Powers**

3.2.1 The main powers authorising the compulsory acquisition of land, or interests in, or rights over land, are contained in Article 20 (compulsory acquisition of land) and Article 23 (compulsory acquisition of rights) of the DCO.

3.2.2 Other compulsory acquisition powers are sought in the DCO (identified in Section 3.3) and these similarly relate to land and will, or may, interfere with property, rights and interests.

3.2.3 In addition, powers are sought in the DCO to enable the temporary possession and use of land (Article 29 – temporary use of land for carrying out the authorised development).

3.2.4 In each case, the owner of the Land, or the interest or right in the Land, may be entitled to compensation.

#### **3.3 Other compulsory acquisition powers**

3.3.1 The other compulsory acquisition powers sought by the Applicant in the DCO are outlined below.

##### **Article 24 Private Rights Over Land**

3.3.2 Article 24 provides for the extinguishment of all existing private rights over land from the earlier of the date of acquisition of the Land or the date on which the Applicant enters the Land.

3.3.3 The article further provides that, where new rights are being compulsorily acquired on land then any existing private rights or restrictive covenants which that land is subject to shall be extinguished to the extent that continuing those private rights or restrictive covenants would be inconsistent with the new right acquired or restrictive covenant imposed.

3.3.4 With regard to land that the Applicant may take temporary possession of under the DCO, Article 24 provides that all private rights over that land will be suspended and unenforceable for as long as the Applicant is in lawful possession of the Land.

##### **Article 27 Acquisition of Subsoil or Airspace Only**

3.3.5 Article 27 provides that where the Applicant has, in respect of any land, powers of compulsory acquisition under Article 20 above then it may, for the same purposes for which it is authorised to acquire the whole of the Land, choose instead to acquire only the subsoil underneath or the airspace over the Land.

##### **Article 28 Rights Under or Over Streets**

3.3.6 Article 28 would authorise the Applicant to:

- enter on and appropriate so much of the subsoil underneath or airspace

over any street within the limits of the DCO as may be required to provide the Scheme

- use that subsoil or airspace for the purposes of carrying out the Scheme or any purpose ancillary to it

3.3.7 Save in the case of subways or underground buildings, or to cellars or similar structures forming part of a building fronting the street, the Applicant may exercise its powers under this Article without having to acquire any part of the street or any easement or right in the street.

### 3.4 **Temporary Possession Powers**

3.4.1 The Applicant further seeks, in the DCO, powers to take temporary possession of land to carry out and thereafter maintain the Scheme as detailed below.

#### **Article 29 Temporary Use of Land for Carrying Out the Authorised Development**

3.4.2 Article 29 would authorise the Applicant to take temporary possession of:

- the Land specified in column 1 of Schedule 7 to the DCO; or
- any other land within the limits of the DCO, so long as the Applicant has not served a notice of entry or executed a general vesting declaration in respect of that land.

3.4.3 In addition to taking possession of the Land, the Article would authorise the Applicant to:

- remove any buildings and vegetation from the Land
- construct temporary works (including accesses) and buildings on the Land
- construct any works on the Land as specified in Schedule 1 to the DCO

3.4.4 The power to take temporary possession of land would be subject to the time limits set out in Article 29. The Applicant cannot remain in possession unless the owner of the Land agrees after:

- as regards to any land specified in columns 1 of Schedule 7 to the DCO, for more than a year after completing that part of the Scheme specified in relation to that land in column 3 of Schedule 7; and
- as regards to any other land included in the DCO, for more than a year after completing the work for which temporary possession was taken (unless before the end of that period the Applicant has made a vesting declaration or served notice of entry in relation to that land).

3.4.5 Article 29 provides that before giving up possession of any land the Applicant is obliged to remove all temporary works and restore the land to the condition it was in on the date on which possession of the land was first taken or such other condition as may be agreed with the owners of the land.

### **Article 30 Temporary Use of Land for Maintaining the Authorised Development**

- 3.4.6 Article 30 would empower the Applicant to take temporary possession of any land within the limits of the DCO, if reasonably required for the purpose of maintaining the Scheme, at any time during the maintenance period (i.e. five years from the date on which that part of the Scheme is first opened for use).
- 3.4.7 Article 30 would allow the Applicant to construct temporary works and buildings on the Land, so far as reasonably necessary for the purpose of carrying out the maintenance. The Applicant would not be able to take temporary possession of a house, or a garden belonging to a house, or any other occupied building under this Article.
- 3.4.8 The Applicant would only be able to remain in possession of land under this Article for so long as may be reasonably necessary to carry out the maintenance of the part of the Scheme for which possession was taken. Before giving up possession of the land, the Applicant is required to remove all temporary works and restore the land to the condition it was in on the date on which possession of the land was first taken or such other condition as may be agreed with the owners of the land.

### **Other Rights and Powers**

- 3.4.9 If made, the DCO would also confer on the Applicant other rights and powers that may interfere with property rights and private interests. These additional powers are:
- Article 12: Temporary stopping up and restriction of use of streets
  - Article 13: Permanent stopping up and restriction of use of streets and private means of access
  - Article 18: Protective works to buildings
  - Article 19: Authority to survey and investigate the land
  - Article 31: Statutory undertakers
  - Article 34: Felling or lopping of trees and removal of hedgerows

### **3.5 Conclusions**

- 3.5.1 The Applicant considers that the powers sought in the DCO as set out in this Chapter are reasonable, proportionate and necessary to deliver and thereafter maintain the Scheme.

## **4 LAND INTERESTS**

### **4.1 Extent of Land Subject to Compulsory Acquisition Powers**

4.1.1 The full extent of the Land subject to powers of compulsory acquisition and required to enable the Applicant to construct the Scheme as described in Chapter 2 of this Statement is shown on the Land Plans (document reference TR010035/APP/2.2) as well as a colour-coded representation of the proposed usage i.e. permanent land acquisition, temporary land acquisition or temporary land acquisition with permanent rights to be created and the Works Plans (document reference TR010035/APP/2.3). In addition to this Statement, short textual descriptions, together with details of ownership, for each of the numbered plots are provided in the BoR (document reference TR010035/APP/4.3).

### **4.2 Total Area of Land Affected by the Scheme**

4.2.1 The Land for which compulsory acquisition and temporary possession powers are sought comprises 107.9 hectares. Of this, 51.9 hectares is required permanently (freehold to be acquired where not already held by the Applicant), 54.9 hectares is required for temporary possession, 1.1 hectares is required for rights of access and 5.6 hectares is required for the de-trunked road. It should be noted that 5.0 hectares of the Land to be acquired or used permanently is land contained within the existing trunk road highway boundary and 1.8 hectares is within the existing local authority highway boundary.

### **4.3 Location**

4.3.1 The location of the Scheme in its wider geographical context is shown on the Location Plan (document reference TR010035/APP/2.1). The Scheme is located within the administrative areas of Lancashire County Council, Fylde Borough Council and Wyre Borough.

4.3.2 The Scheme lies to the north east of Blackpool and would provide a bypass of the settlement of Little Singleton. The settlement of Poulton-le-Fylde lies adjacent to the south western extent of the Land.

### **4.4 Existing Land Use**

4.4.1 The majority of the Land is in agricultural use comprising land to the south of the existing A585 between the Skippool Bridge junction and the Windy Harbour junction.

4.4.2 Two residential properties will require demolition as part of the Scheme.

4.4.3 A number of Public Rights of Way cross the Land.

4.4.4 A number of accesses and tracks lie within the Land, predominantly of an agricultural nature.

4.4.5 A number of watercourses lie within the Land with the largest being Main Dyke which runs beneath the existing A585 Mains Lane at Skippool Bridge along with Horsebridge Dyke that runs beneath the existing A585 at Skippool Junction. In addition, several field drainage ditches are within the Land.

4.4.6 There are no statutory designated sites for nature conservation within the Land.

4.4.7 There is one non-statutory designated site the Skippool Marsh and Thornton Bank Biological Heritage Site located to the west of the Scheme.

- 4.4.8 Skippool Service Station forecourt would be modified as part of the Scheme, with alternative access and egress arrangements proposed.
- 4.4.9 The Land to be acquired does not include any special categories of land comprising:
- land held by the National Trust inalienably
  - Land forming part of a common (including a town or village green), open space, or fuel or field garden allotment
- 4.4.10 A brief description of the current use of each plot is included in the BoR (document reference TR010035/APP/4.3).
- 4.5 **Identifying persons with an interest in the Land**
- 4.5.1 In preparing the DCO application, the Applicant has carried out diligent inquiry in order to identify all persons with an interest in the Land as defined in section 44 of the PA 2008. Such persons are listed in the Book of Reference (document reference TR010035/APP/4.3) and have been consulted about the DCO application in accordance with section 42 of the PA 2008.
- 4.5.2 Such persons with an interest in the Land, as defined by Section 44 of the Act, are required under Section 42 of the Act to be identified through diligent inquiry and consulted on a proposed application for development consent.
- 4.5.3 The methods that were used as part of the diligent inquiry process are captured in the following paragraphs:
- 4.6 **Category 1 and 2 persons**
- 4.6.1 The title documents for the properties and land that would be subject to compulsory acquisition were acquired through a Scheme-wide search of the Index Map held by the Land Registry in September 2017. A review was carried out in June 2018 and any changes in ownership within the red line boundary have been updated in the Book of Reference. The Title Documents were then used to identify the category 1 and 2 interests for the purposes of Section 44(1) and Section 44 (2) of the Act by undertaking a title review.
- 4.6.2 On completion of the above exercise the extent of the unregistered land interests became known. In order to establish ownership of unregistered land that falls within the proposed land requirements the following sources of information were used:
- The posting of site notices
  - Rural Payments Agency
  - Companies House/Mutuals Register/Charity Commission: web-based checks were undertaken to verify registered addresses.
  - 192.com/BT Phonebook/Electoral Roll: web-based checks were undertaken to verify residential property addresses and to identify potential occupiers.
  - Moiety Owners: where highway is unregistered, owners either side of the landownership parcel have been assumed as having a subsoil interest of the half width of the highway to its centreline. Similarly, where a watercourse is unregistered, owners either side of the watercourse have

been assumed to have a riparian interest of the half width of the watercourse to its centreline

- Neighbouring Landowners: where required, neighbouring landowners have been approached to identify interests in unregistered land. Electoral role information was also reviewed.
- Engagement with Local Authorities: Lancashire County Council, Fylde Borough Council and Wyre Borough Council to obtain current Adopted Highway and Public Rights of Way plans.
- Site visits: they have been undertaken to review the physical context of the Scheme and to ensure that all physical features within the site are noted for the purpose of land descriptions, special interests, access ways, footpaths, statutory undertakers etc.
- Engagement with Environment Agency and Lancashire County Council to understand ownership and maintenance of any waterways and include Moiety owners in respect of riparian rights.
- Checking for local land charges, such as Mines and Minerals, Coal Authority and Lord of the Manor etc.

#### 4.7 **Category 3 persons who may fall under section 10 of the Compulsory Purchase Act 1965 (CPA 1965) and/or section 152(3) of the PA 2008**

4.7.1 Identification of Category 3 persons, as defined in section 44 of the PA 2008, was undertaken at the early stages of development of the Scheme, in order to inform the design of the Scheme and preparation of the DCO application.

4.7.2 In order to identify potential Category 3 persons who may have a claim pursuant to section 10 of the CPA 1965, a desk-based assessment was carried out to identify properties with a potential claim. In addition, discussions were held with the district valuer to inform the process and site visits were also undertaken.

4.7.3 Furthermore, proposed new residential developments, identifiable from the Local Plan or from local authority information on developments with the benefit of planning permission were taken into account.

#### 4.8 **Assessment of Category 3 persons which fall under Part I of the LandCompensation Act 1973 (LCA 1973)**

4.8.1 In assessing potential claimants under Part I of the LCA 1973, physical factors and the impact of the Scheme were considered, including:

- Properties closest to the Highway within the DCO boundary; and
- Properties identified as a receptor as a consequence of the property being located outside the DCO limits but close to the Highway;

4.8.2 The Applicant's land referencing team were provided with guidance from environmental specialists. This guidance was based on the topography of the land and the likely significant effects arising from the Scheme. For example, the noise assessments had regard to information available at that time regarding:

- Background noise levels; and

- Distances to receptors.

4.8.3 Based on the above information, professional judgement was used to ascertain whether a person may have a relevant claim for compensation under section 57(4) of the PA 2008, based on a worst case assessment. Further details about the noise assessments and other environmental assessments undertaken can be found in the Environmental Statement (document reference TR0100135/APP/6.1-6.17).

#### 4.9 **Contact referencing**

4.9.1 Following the initial non-contact methods above, persons identified as having an interest in the Land were issued with a letter and questionnaire requesting return of information about their interests in the Land. This was then followed up by site visits to facilitate completion of the questionnaire and the highest possible return rate.

#### 4.10 **Negotiations to acquire by agreement**

4.10.1 As well as consulting all persons with an interest in the Land about the Scheme proposals in accordance with section 42 of the PA 2008, the Applicant is aware of the requirement (paragraph 25 of the DCLG Guidance) to seek to acquire land by negotiation wherever practicable. The power to acquire land compulsorily should only be sought if attempts to acquire by agreement fail.

4.10.2 At the same time, the Applicant notes that the DCLG Guidance also recognises that where proposals would entail the compulsory acquisition of many separate plots of land, it may not always be practicable to acquire each plot of land by negotiated agreement. As the DCLG Guidance states, "Where this is the case, it is reasonable to include provision authorising compulsory acquisition covering all the land required at the outset."

4.10.3 The Applicant has engaged with landowners and occupiers with a view to acquiring their land interest by agreement by writing to them to inform them of the Applicant's willingness to negotiate to acquire the Land by agreement, and to invite dialogue on this point. As a result, the Applicant is in the process of engaging with a significant proportion of landowners with regard to the acquisition of land by agreement; and negotiations with this objective will be ongoing throughout the DCO process. The status of such negotiations is set out in Appendix A to this Statement.

4.10.4 Whilst negotiations are ongoing, the Applicant is mindful that it is under a duty to acquire land at best value and that it is required to deliver the Scheme within a specified timescale. It has concluded that it may not be possible to acquire all land interests necessary to deliver the Scheme within this timescale. There are further parcels of land in unknown ownership which cannot be acquired by agreement. The Applicant has therefore concluded that the Scheme is unlikely to be capable of being delivered without compulsory acquisition powers.

4.10.5 Land already owned by the Applicant is included in the DCO in order to ensure that no known or unknown third-party rights, which might impede delivery of the Scheme, remain over the land.

## **5 THE CASE FOR COMPULSORY ACQUISITION**

### **5.1 Statutory Conditions and the Case for Compulsory Acquisition**

5.1.1 In seeking compulsory purchase and temporary possession powers in the DCO, the Applicant has had regard to the conditions in Section 122 of the 2008 Act and to the tests set out in the DCLG Guidance.

5.1.2 Section 122 of the 2008 Act provides that a DCO that includes compulsory acquisition powers may only be granted if the conditions in Section 122(2) and Section 122 (3) of the Act are met. The conditions are:

- At Section 122(2) that the Land is required for the Scheme to which the DCO relates, or is required to facilitate or is incidental to the Scheme, or is replacement land that is to be given in exchange under Section 131 and Section 132 of the Act; and
- At Section 122(3), that there is a compelling case in the public interest for inclusion of powers of compulsory acquisition in the DCO.

5.1.3 In respect of the Section 122(2) condition, the DCLG Guidance makes it clear (at paragraph 11 and following) that the decision maker must be in no doubt as to the purposes for which any land is to be compulsorily acquired, in particular:

- In respect of land required for a Scheme for which development consent is sought, the Applicant must be able to demonstrate that the Land is needed and the Secretary of State must be satisfied that the Land which is proposed to be acquired is no more than reasonably required for the purposes of the Scheme.
- In respect of land required to facilitate that which is incidental to the proposed Scheme, the Secretary of State must be satisfied that the purpose for which the Land is being acquired could only be achieved to a satisfactory standard if the Land in question is compulsorily acquired, and the Land to be taken is no more than is reasonably necessary for that purpose and is proportionate.
- In respect of any land that is replacement land which is proposed to be given in exchange under Section 131 or Section 132 of the Act, the Secretary of State will need to be satisfied that the compulsory acquisition is needed for the replacement land, that no more land is being taken that is reasonably necessary for that purpose, and that what is proposed is proportionate.

5.1.4 In respect of the Section 122(3) of the Act, the DCLG Guidance makes it clear at paragraphs 12 and 13 that the Secretary of State must be satisfied that there is a compelling case in the public interest for the Land to be acquired compulsorily. The Secretary of State must be persuaded that the public benefits that would be derived from the compulsory acquisition will outweigh the private loss that would be suffered by those whose land is acquired.

5.1.5 Paragraphs 8 to 10 of the DCLG Guidance set out a number of general considerations that the Applicant must, in justifying an order that authorises compulsory acquisition, demonstrate to the satisfaction of the Secretary of State.

These are:

- That all reasonable alternatives to compulsory acquisition (including modifications to the Scheme have been explored)
- That the proposed interference with the rights of those with an interest in the Land is for a legitimate purpose and is necessary and proportionate
- That the Applicant has a clear idea of how the Land which it is proposed to be acquired will be used
- That there is a reasonable prospect of the funds for acquisition becoming available
- That the purposes for which an order authorises the compulsory acquisition of land are legitimate and are sufficient to justify interfering with the human rights of those with an interest in the Land affected.

5.1.6 Finally, paragraph 25 of the DCLG Guidance states that applicants should seek to acquire land by negotiation wherever practicable.

## 5.2 **Need for the Land and the purposes for which the compulsory acquisition powers are sought (Section 122(2))**

5.2.1 The Applicant is satisfied that the condition in section 122(2) of the Act is met. It considers that the Land subject to compulsory acquisition and temporary possession powers is either needed for the development, or is needed to facilitate the Scheme, or is incidental to the Scheme.

5.2.2 Chapter 4 and Appendix B of this Statement sets out the Land that is required (or facilitates or is incidental to) the purposes of the DCO. The application is supported by Land Plans (document reference/TR010035/APP/2.2) and Works Plans (document reference TR010035/APP/2.3). The location of the works on the Works Plans demonstrates and justifies that the Land as shown on the Land Plans is required in order for the Scheme to be constructed; without which Land the Scheme cannot be delivered.

5.2.3 The Applicant considers that the land included in the DCO is the minimum land-take required to construct, operate, maintain and mitigate the Scheme necessary to achieve the objectives of the Scheme.

5.2.4 The limits of the Land have been drawn as tightly as possible so as to avoid unnecessary land take. In the event that less land proves to be required in a particular area at a later stage, the Applicant would only seek to acquire that part of the Land that is required and, in all events, will seek to minimise effects on landowners.

5.2.5 Temporary land required for the Scheme has been minimised as far as possible.

5.2.6 An area of land (Land reference 8/02e and 8/04) has been defined within the Land to provide mitigation for the potential disturbance / displacement impacts on certain birds during construction, the land would provide a combination of habitats suitable for pink-footed geese, lapwing and curlew. The size and location of the area was determined as part of the Habitats Regulations Assessment (document reference TR010035/APP/5.4) in consultation with Natural England. The site selection has been informed by the bird survey results, the mitigation that needs to be delivered,

the location of the site and the ability for the Land to be managed. The location of the mitigation area is shown on Insert 2-1.

- 5.2.7 The mitigation area would be under the control of Highways England for the duration of the construction period (2020 to 2022) and managed accordingly to deliver the required mitigation.
- 5.2.8 Appendix B of this Statement sets out why compulsory powers are necessary in relation to each individual parcel of the Land with reference to the relevant DCO works numbers. The first column of these tables uses the plot numbers and are shown on the Land Plans (document reference TR010035/APP/2.2) and used in the BoR (document reference TR010035/APP/4.3). The second column in the tables refers to the works numbers as shown on the Works Plans (document reference TR010035/APP/2.3) and as described in Schedule 1 of the DCO (document reference TR010035/APP/3.1). As such, Schedule 1 provides detailed descriptions of each of the numbered works shown on the Works Plans.
- 5.2.9 Table B1 in Appendix B lists all of the Land that is to be acquired outright. The purpose for acquiring this land is to enable the Applicant to construct the permanent works on the Land and other elements described in Table B1.
- 5.2.10 Schedule 5 of the DCO (document reference TR010035/APP/3.1) lists the Land over which specific rights are to be acquired or created. The rights to be acquired or created are necessary for the purposes of constructing the works and the maintenance of the Scheme thereafter ensuring the finished Scheme fulfils its highway functions. This information is shown in Table B2 in Appendix B.
- 5.2.11 Schedule 7 of the DCO (document reference TR010035/APP/3.1) lists the Land over which the Applicant would take temporary possession. This information is shown in Table B3 in Appendix B. The specific purposes for which this land will be used are stated in the schedule. The purpose of using such land is to provide essential works sites, compounds and storage areas. The temporary use of this land is essential to the construction works that form part of the Scheme. The temporary power minimises the impact on landowners by ensuring that the Applicant does not have to acquire land it only requires temporarily.
- 5.2.12 The compulsory acquisition powers are also required as a means of overriding existing rights and interests in or over the Land, as well as creating new rights over the Land and granting the right to take temporary possession of the Land.

### 5.3 **Compelling Case in the Public Interest (Section 122 (3))**

- 5.3.1 The Applicant is satisfied that the condition in section 122(3) of the Act is met and that there is a compelling case in the public interest for compulsory acquisition.
- 5.3.2 The need for and the benefits of the Scheme are set out in Chapter 2 of this Statement and in the other application documents, including the Planning Statement (Application Document Reference: TR010016/APP/7.1), specifically Chapter 2 'The Scheme' which considers the need for the scheme and the economic case. Together, they demonstrate that there is a very strong and compelling case in the public interest for the Scheme to be delivered.
- 5.3.3 The existing route currently causes a number of negative issues for local people. There are delays at junctions causing an increase in journey times and high accident

rates which reduce journey time reliability. The A585 is in the worst 10% of routes in the NW for reliability. The routes are already at capacity which will worsen with planned long-term traffic growth. Without the Scheme, the roads will continue to attract more traffic, which combined with continued growth will lead to a further increase in delays and reduced journey time reliability.

- 5.3.4 The NPS NN sets out the Government's policy against which the Secretary of State will make decisions on applications for NSIPs on the strategic road and rail networks. In determining the application, the Secretary of State must have regard to the NPS NN and the application must be decided in accordance with it, as required by Sections 104(2) and (3) of the Act.
- 5.3.5 The objectives of the Scheme which align with those stated in the NPS NN are to improve connectivity, reduce congestion and improve journey time reliability, improve resilience, improve safety and reduce/ minimise noise impacts along the A585 between Windy Harbour junction and Skippool junction.
- 5.3.6 Paragraph 2.2 of the NPS NN states that there is a "critical need" to improve the national networks to address road congestion and crowding on the railways to provide safe, expeditious and resilient networks that better support social and economic activity; and to provide a transport network that is capable of stimulating and supporting economic growth. It goes on to state that improvements may also be required to address the impact of the national networks on quality of life and environmental factors.
- 5.3.7 The Planning Statement and National Policy Accordance (document reference TR010035/APP/7.1) demonstrates that there is a very strong and compelling case in the public interest for the DCO to be made, utilising local, regional and national policy as the relevant evidence base. The Planning Statement sets out an extensive case for the Scheme on the basis of the NNNPS. These matters are not repeated here.
- 5.3.8 The powers of compulsory acquisition are proportionate as:
- they are no more than are necessary for delivery of the Scheme
  - in respect of the Land, no larger in extent than is necessary for delivery of the Scheme and all land to be subject to compulsory acquisition has an identified purpose in delivering the Scheme, as provided in the tables in Appendix B of this Statement
  - there are no alternatives to the Scheme that would reduce the amount of land that is to be subject to powers of compulsory acquisition (see Section 5.5)
  - the inclusion of powers of compulsory acquisition in the DCO at the outset (i.e. at Application) is appropriate for a Scheme such as this, as provided for at paragraph 25 of the DCLG Guidance.
- 5.3.9 It follows that there is a similarly compelling case in the public interest to include the compulsory powers being applied for.

## 5.4 **Case for the Scheme and Alternatives Considered**

- 5.4.1 Chapter 4 of the Environmental Statement (document reference TR010035/6.4) and

the Planning Statement and National Policy Accordance (document reference TR010035/7.1) outline in detail the alternative options for the Scheme that the Applicant has considered. It is demonstrated that the most appropriate option has been selected. None of the alternative options would obviate the need for compulsory acquisition. The need for a Scheme has been recognised for a very long period of time as summarised in the subsequent paragraphs.

- 5.4.2 The Fylde Coast Easterly Bypass was originally added to the Department of Transport trunk road programme in 1987 but was withdrawn from the programme in 1994. However, Lancashire County Council decided to protect that route at that time but was not able to secure funding for that scheme.
- 5.4.3 In 2005 the Fylde Coast Sub-Regional Transport Study was commissioned by Lancashire County Council (LCC) to investigate options to improve access to Fleetwood from the national motorway network (the M55). That study, known as the M55-Norcross Link continued until an extensive public consultation was held in 2006.
- 5.4.4 In 2009 the Fleetwood-Thornton Area Action Plan was prepared, and it considered the potential for development on the Fylde Peninsula and its possible effects on the A585 route as part of a sustainable transport strategy. It concluded: "Sections of the A585(T) outside of the Area are operating close to capacity, and further development within the Area would lead to additional traffic and further congestion. The lack of capacity on the A585(T) could pose a significant constraint to the future development of the Area."
- 5.4.5 In 2012, as part of the development of the Fleetwood – Thornton Area Action Plan Sustainable Transport Strategy, Wyre Borough Council had asked LCC to provide its opinion on the possible detrunking of the A585 between M55 and Fleetwood. In its response to Wyre Borough Council LCC conclusion stated: "Notwithstanding the lack of a strategic case for retaining the A585 between the M55 and Fleetwood as part of the Strategic Road Network, there is no material advantage to the County Council of pursuing de-trunking. Other things being equal, the additional costs arising from de-trunking will outweigh any benefits or likely increased funding, and it would increase the County Council's liabilities and exposure to risk, for example, in relation to winter service provision. De-trunking could also put at risk delivery of the c£11m of mitigation works set out in the Fleetwood Thornton Area Action Plan Sustainable Transport Strategy."
- 5.4.6 In April 2014, the Highways Agency produced the South Pennines Route Strategy (SPRS) document along with associated Evidence Report and Technical Annex. The South Pennines route includes all east to west sections of the SRN from the Welsh border through to the coast of England. Included in this strategy was the full extent of the A585 corridor from the M55 to Fleetwood.
- 5.4.7 A range of options were considered as part of the Options phase of the Scheme. The options considered are detailed in the Alternatives Assessment Chapter of the Environmental Statement (document reference TR010035/APP/6.4).
- 5.4.8 A consultation was held on the Scheme during 2016. Following that consultation, a Preferred Route Announcement (PRA) for the A585 Windy Harbour to Skippool Scheme was made in October 2017 (the subject of this DCO application).

- 5.4.9 Since the PRA, the Scheme has been developed further and a round of statutory consultation has been undertaken; from 21 March to 8 May 2018. The approach to, and results of these consultations are explained in detail in the Consultation Report (document reference TR010035/5.1).
- 5.4.10 The scope of the compulsory powers has been carefully drawn to limit the powers to what is necessary. No more land is affected than necessary. Where only temporary occupation is required, powers of acquisition have not been applied for. Accordingly, the impact on landowners is minimised and does not outweigh the public interest in granting the compulsory powers so that the public benefits of the Scheme can be delivered.
- 5.4.11 There are two residential properties that are directly affected by the Scheme that are not in the ownership of Highways England. The building of one property (West Wynds) is directly affected by the Scheme and it would have to be demolished. For the other (The Beeches) much of the front garden is required for the Scheme and, although the buildings are not directly affected, it is considered that the effect on the setting on this property is likely to be significant and, if the owners require the property to be acquired it is unlikely that it could be re-sold. This has been communicated with the affected landowners. Refer to Section below for details of the residential properties requiring acquisition by the Scheme.
- 5.4.12 Further information related to the objectives of the Scheme and the case for the Scheme itself, can be found in the Planning Statement and National Policy Accordance (document reference TR010035/APP/7.1). This document comprehensively sets out how the Scheme meets the objectives of local, regional and national policy and so these matters are not repeated here.

## 5.5 **Compensation**

- 5.5.1 Compulsory acquisition powers require that the compensation paid to the owners of the interests in the Land represents a fair, open market value. The rules governing compulsory acquisition require that compensation for acquisition of land or an interest in land must represent the market value as unaffected by the proposed Scheme, together with further amounts such as occupier's loss payments in some cases. As a result, the Applicant will be required to pay a fair, open market price for the Land and rights it acquires, without taking advantages of any reduction caused by the existence of the Scheme. The Applicant has the resources to pay such compensation and has demonstrated (in the Funding Statement (Application Document Reference: TR010016/APP/4.2) that these resources are available.
- 5.5.2 In the event of compensation not being agreed, a judicial process applies. Compensation disputes would be decided by the Upper Tribunal (Lands Chamber), with a right of appeal to the Court of Appeal. The same applies to compensation for loss or damage, payable in respect of the additional compulsory acquisition powers described below.
- 5.5.3 The compulsory acquisition procedure accordingly provides certainty of outcome (the Land or rights required for the Scheme to be delivered will be acquired), certainty of liability to compensation or price to be received, and fairness of outcome via the recourse to the judicial process in the absence of agreement. This benefits all parties.

5.5.4 Compensation payable for the compulsory acquisition of the Land is currently estimated to cost £22.6m. In accordance with paragraph 9 of the Guidance, it is important to demonstrate that there is a degree of certainty for requisite funds being available, and that the lack of funds will not be an impediment to the delivery of the Scheme.

## 5.6 Funding Statement

5.6.1 As detailed in the Funding Statement (document reference TR010035/APP/4.2), provided under Regulation 5(2)(h) of the Regulations, the Scheme will be funded entirely by the Department for Transport. The Scheme has a current cost range estimate of £110m to £221m with a most likely estimate of £154.5m. This figure includes the estimated cost of compulsory acquisition of the Land required for the Scheme.

5.6.2 Accordingly, the Applicant considers that the decision-maker can be satisfied of the Applicant's ability to secure funding for the Scheme and that the requisite funds for payment of any compensation will be available at the appropriate time.

## 5.7 Acquisition by Agreement

5.7.1 The Applicant is aware of the requirement, noted in paragraph 25 of the DCLG Guidance, to seek to acquire land by negotiation wherever practicable. It recognises that the authority to acquire land compulsorily should only be sought as part of an order granting development consent if attempts to acquire by agreement fail. As discussed in Chapter 4 of this Statement, discussions are ongoing with landowners and occupiers (refer to Appendix A of this Statement), but powers of compulsory acquisition over the Land are required to ensure that the Scheme can be delivered in the event that it does not prove possible to acquire the Land by agreement.

5.7.2 The Applicant is under a duty to acquire land at best value and so acquisition by agreement is unlikely to occur in all cases or in any event within sufficient time to ensure that the programme for the construction of the Scheme is met. The Applicant has therefore included compulsory powers in the DCO from the outset. This is in line with the Guidance, which at paragraph 25 acknowledges that this is appropriate for long linear schemes like this one, because it is necessary to acquire a large number of plots and it is not practical to acquire all of them by agreement.

5.7.3 Compulsory acquisition powers serve the important function of ensuring that the compensation paid to the land interests affected represents a fair, open market value. This benefit both the Applicant as the acquiring authority and all those to whom compensation may be payable. The rules governing compulsory acquisition require that compensation for acquisition of land or an interest in land must represent the market value as unaffected by the proposed Scheme, together with further amounts such as occupier's loss payments in some cases. As a result, the Applicant will be required to pay a fair, open market price for the Land and rights it acquires, without taking advantage of any reduction caused by the existence of the Scheme.

## 5.8 Conclusions

5.8.1 The Applicant is satisfied that the conditions in section 122 of the PA 2008 are met and that the tests in the CA Guidance are satisfied.

- 5.8.2 All of the Land subject to compulsory acquisition and temporary possession powers is necessary to construct, operate, maintain and mitigate the Scheme necessary to achieve the objectives of the Scheme. The extent of the Land sought is reasonable and proportionate.
- 5.8.3 Further there is a compelling case in the public interest to include the compulsory acquisition powers sought by the Applicant in the DCO. The exercise of the compulsory acquisition powers that are sought is shown throughout this Statement to be necessary and proportionate to the extent that interference with private land and rights is required. In the absence of compulsory powers, the Applicant considers that it would not be possible to proceed with the Scheme, therefore the public benefits of the Scheme would not be realised.

## **6 SPECIAL CONSIDERATIONS**

### **6.1 Crown Land**

6.1.1 The Duchy of Lancaster has a freehold interest to mines and minerals 100 feet below the surface in respect of plots 1/02, 1/04a, 1/04b, 1/05, 1/05a, 1/05b, 1/05c, 1/05d, 1/06, 1/07m, 1/07n, 1/07o, 1/30, 1/30a, 1/30b, 1/30c, 1/34a, 1/34b and 1/34e (Lands Plans)(document reference TR010035/APP/2.2) and Crown Land Plan (document reference TR010035/APP/2.11).

6.1.2 Temporary possession is proposed to be taken of plots 1/05a, 1/05b, 1/05c, 1/05d, 1/30a, 1/30b, 1/34a, and 1/34b for the purposes of carrying out of the Scheme, including the provision of a temporary construction compound at plot 1/05c for the duration of the works. There will be no encroachment on the rights of the Duchy of Lancaster during the period of temporary possession.

6.1.3 Permanent acquisition of plots 1/02, 1/04a, 1/04b, 1/05, 1/06, 1/07m, 1/07n, 1/07o, 1/30, 1/30c and 1/34e is proposed. However, the Applicant will not need or be authorised to acquire the Duchy of Lancaster's interest in these plots and there will be no encroachment on the rights of the Duchy of Lancaster.

### **6.2 Special Category Land**

6.2.1 None of the Land is special category land for the purposes of Section 131 or 132 of the Act.

### **6.3 Statutory Undertaker Land**

6.3.1 Section 138 of the Act applies if a DCO authorises the acquisition of land (compulsorily or by agreement) and:

- There subsists over the Land a relevant right; or
- There is on, under or over the Land relevant apparatus.

6.3.2 For the purposes of Section 138 of the Act:

- as defined by Section 138 (2) of the Act: 'a relevant right' means a right of way, or a right of laying down, erecting, continuing or maintaining apparatus on, under, or over land which is vested in or belongs to statutory undertakers for the purpose of the carrying on of their undertaking
- as defined by Section 138 (3) of the Act 'relevant apparatus' means apparatus vested in or belonging to statutory undertakers for the purpose of the carrying on of their undertaking, or electronic communications apparatus kept installed for the purposes of an electronic communications code network.

6.3.3 A DCO may only include provision for the extinguishment of the relevant right, or the removal of the relevant apparatus, if the Secretary of State is satisfied that the extinguishment or removal is necessary for the purpose of carrying out the Scheme to which the DCO relates (Section 138 (4) of the Act).

6.3.4 The draft DCO includes provision to authorise necessary interference by the Applicant with the apparatus of statutory undertakers, in connection with the delivery of the Scheme, as detailed in the following paragraphs.

- 6.3.5 A number of existing utility services are located in the area and would be affected by the Scheme. The location of these works is shown on the Works Plans (document reference TR010035/APP/2.3) and are defined as specific works within Schedule 1 (Authorised Development) of the DCO. They are presented in Table 6-1.
- 6.3.6 There are a number of utility diversions that would form part of enabling works in advance of, or are integrated into, the construction of the Scheme. These include diversion or protection work upon the assets of:
- United Utilities (Water distribution and waste water)
  - Cadent (National Grid) Gas pipes and supplies
  - GTC Ltd Local gas distribution
  - British Telecom – Openreach (underground and overhead cables)
  - Electricity North West (underground and overhead power supplies)
  - Thornton Facilities Management (Former ICI Pipeline)
- 6.3.7 The statutory undertakers have been consulted as part of the New Road and Street Works Act (NRSWA) C3 enquiries and meetings have been held with each undertaker in development of the Scheme. The information obtained has been reflected in the DCO documents and Statements in Common Ground are in development with the relevant parties and will be updated as the process continues.

Table 6-1: Utility Services Affected by the Scheme

<b>Statutory Undertaker Engagement</b>	
Statutory Undertaker	Relevant Work No.
United Utilities Group PLC	3, 7, 34, 36, 51, 53, 60, 61, 67, 73, 77, 116
Cadent Gas Limited	16, 27, 54, 69, 76, 80
Openreach (British Telecommunications PLC)	15, 24, 32, 33, 65, 75, 81, 121
Electricity North West Limited	6, 8, 26, 30, 31, 42, 64, 71, 72, 112
GTC	120

## 7 HUMAN RIGHTS

### 7.1 The protected rights

7.1.1 The Human Rights Act 1998 incorporated into domestic law the provision of the European Convention on Human Rights ("ECHR"). The ECHR includes provisions in the form of Articles, which aim to protect the rights of the individual. The relevant Articles can be summarised as follows:

- Article 1 of The First Protocol – protects the rights to peaceful enjoyment of possessions. No one can be deprived of their possessions except in the public interest.
- Article 6 – entitles those affected by compulsory powers to a fair and public hearing.
- Article 8 – protects the right of the individual to respect for his private and family life, his home and his correspondence. Interference with this right can be justified if it is in accordance with law and is necessary in the interests of, among other things, national security, public safety or the economic wellbeing of the country.

7.1.2 Section 6 of the Human Rights Act 1998 prohibits public authorities from acting in a way which is incompatible with rights protected by the ECHR.

7.1.3 Paragraph 10 of the CA Guidance sets out how applicants should take into account Human Rights:

*“The Secretary of State must ultimately be persuaded that the purposes for which an order authorises the compulsory acquisition of land are legitimate and are sufficient to justify interfering with the human rights of those with an interest in the land affected. In particular, regard must be given to the provisions of Article 1 of the First Protocol to the European Convention on Human Rights and, in the case of acquisition of a dwelling, Article 8 of the Convention.”*

7.1.4 The DCO, if made, may infringe the human rights of persons with an interest in land. This infringement is authorised by law provided that:

- There is a compelling case in the public interest for the compulsory acquisition powers included within the DCO, and that proper procedures are followed.
- Any interference with a human right is proportionate and otherwise justified.

7.1.5 There are two occurrences on the scheme of acquiring residential property. A summary of the discussions with the landowners have been captured in Appendix A.

#### **West Wynds, Old Mains Lane, Poulton-le-Fylde, FY6 7LA**

7.1.6 The building is directly affected by the Scheme and is proposed for demolition.

7.1.7 The land is required for the construction and operation of the main carriageway, construction of the replacement Skippool bridge and associated retaining walls. The justification for the acquisition and interference with rights in this location is to ensure the preferred route alignment of the main carriageway is compliant with design safety standards. The justification of the preferred route in this location is provided in

the Consultation Report (document reference TR010035/APP/5.1). It has not been possible to minimise harm to the residential property as demolition is required for the construction of the scheme.

- 7.1.8 Engagement has been carried with the owners of the residential property since the inception of the scheme. Highways England is currently in negotiation with the owners to purchase the residential property.

**The Beeches, 205 Mains Lane, Poulton-le-Fylde, FY6 7LB**

- 7.1.9 The land comprising the majority of the 20m deep front garden of this property is required for the construction and operation of the main carriageway including the realigned A585 providing a stopping sight distance of a minimum of 120m for westbound traffic and for the neighbouring petrol station. As a result, approximately two-thirds of the front garden would be required from the property resulting in the boundary being within 7.5m of the front of the building. It would be possible for access to this property to be re-provided off the new main carriageway. Harm has been minimised to this property by maintaining Stopping Sight Distances through the junction away from the property. However due to the likely impact to the property's front garden and its general setting close to the Skippool Bridge Junction it is likely that the current owners may wish to relocate due to the level of impact to their property.
- 7.1.10 Engagement has been carried out with the owners of the residential property since the non-statutory consultation in Autumn 2016. Highways England is currently in discussion with the owners to how they wish to proceed.
- 7.1.11 In the event that the owners wish the property to be acquired by the Highways England it is considered unlikely that this property could be re-sold on completion of the construction works. In that instance, the buildings would be demolished and the land used for environmental mitigation.

**7.2 Compliance with the convention**

- 7.2.1 The Applicant recognises that the Scheme may have an impact on individuals but considers that the significant public benefits that will arise from the Scheme as set out in this Statement outweigh any harm to those individuals. The DCO strikes a fair balance between the public interest in seeing the Scheme proceed (which is unlikely to happen in the absence of the DCO) and the private rights which will be affected by the compulsory acquisition.
- 7.2.2 In relation to both Article 1 and 8, the compelling case in the public interest for the compulsory acquisition powers included within the DCO has been demonstrated in Chapter 5 of this Statement and in the Planning Statement and National Policy Accordance (document reference TR010035/APP/7.1). The land over which compulsory acquisition powers are sought as set out in the DCO is the minimum necessary to ensure the delivery of the Scheme. The Scheme has been designed to minimise harm whilst achieving its publicly stated objectives. In this respect the interference with human rights is both proportionate and justified.
- 7.2.3 In relation to Article 6, the Applicant is content that the proper procedures have been followed for both the consultation on the Scheme and in determining the compulsory acquisition powers included within the DCO. Throughout the development of the Scheme, the Applicant has given persons with an interest in the land a full

opportunity to comment on the proposals, both in a statutory and non-statutory capacity, and the Applicant has endeavoured to engage with landowners. [The Applicant has had regard to landowner feedback in both the initial design of the Scheme and in iterative design changes throughout the life of the Scheme.] Examples of design changes are provided within the Consultation Report (document reference TR010035/5.1).

7.2.4 Furthermore, any individuals affected by the DCO may submit representations by way of an objection to the Application in response to any notice given under section 56 of the PA 2008, the examination of the application by the examining authority, any written representations procedure which the examining authority decides to hold and in particular, any compulsory acquisition hearing held under section 92 of the PA 2008, at which each affected person is entitled to make oral representations about the compulsory acquisition request.

7.2.5 If the DCO is made, a person aggrieved may challenge the DCO by judicial review in the High Court if they consider that the grounds for doing so are made out pursuant to section 118 of the PA 2008.

### 7.3 **Fair compensation**

7.3.1 Any person affected by the exercise of compulsory acquisition powers or by the exercise of temporary possession, may be entitled to compensation. This entitlement to compensation is provided for by the existing compensation code and Article(s) 12, 13, 19, 23, 24, 28, 29, 30, 34, and Schedule 6 to the DCO. The Applicant has the resources to pay such compensation and has demonstrated (in the Funding Statement (document reference TR010035/APP/4.2)) that these resources are available.

7.3.2 Any dispute in respect of the compensation payable may be referred to the Upper Tribunal (Lands Chamber), an independent tribunal, for determination.

### 7.4 **Conclusion**

7.4.1 For the reasons set out above, the Applicant considers that any infringement of the ECHR rights of those whose interests in the land might be affected by the exercise of powers of compulsory acquisition would be proportionate and legitimate, would be in the public interest and would be in accordance with national and European law. The Applicant therefore considers that it would be appropriate and proportionate for the Secretary of State to make the DCO including the grant of compulsory acquisition powers

## 8 CONCLUSIONS

- 8.1.1 This Statement sets out why compulsory acquisition and temporary possession powers have been sought in the DCO application and explains why the Applicant considers such powers to be necessary, proportionate and justified.
- 8.1.2 In determining the extent of compulsory acquisition and temporary possession powers proposed in the DCO, the applicant has had regard to the legislative tests set out in the Planning Act 2008 and to the advice in the DCLG Guidance. The Applicant is content that the scope of the powers sought and the extent of the interests in the Land to be acquired by compulsory acquisition are required for the Scheme and are the minimum necessary that will allow the Applicant to construct, operate and maintain the Scheme. The purpose for which each part of the Land is required is set out in Appendix B of this Statement.
- 8.1.3 The Applicant has consulted all persons affected by the compulsory acquisition and temporary possession powers and persons who may have a claim for compensation arising from the Scheme. It has consulted such persons during preparation of the DCO application and in the design of the Scheme to address their concerns and to ensure that any impacts are reduced or removed. The design of the Scheme has also been informed by buildability and constriction advice to minimise as far as possible impacts on people and their properties. The Applicant has further sought to acquire any interests in the Land by agreement wherever practicable. The status of the negotiations with affected landowners for the acquisition of their land interest is set out in Appendix A of this Statement.
- 8.1.4 The Applicant has considered the human rights of the individuals affected by the compulsory acquisition and temporary possession powers. It is satisfied that there is a compelling public interest case for compulsory acquisition and that the significant public benefits arising from the Scheme will outweigh the harm to those individuals.
- 8.1.5 Without the grant of compulsory acquisition and temporary possession powers, the Applicant considers that it will not be possible to construct the Scheme, or realise the public benefits arising from it.
