Sent from my iPad I am writing to you regarding the new road which is gathering more and more expense by the week, road junctions are more complicated and the rat runs will be used as there will be no other alternatives. If route 2 had been taken there would have been one flyover, the water would have been stored and distributed well away from Yeovilton RNAS and probably thousands of pounds saved with little disruption to the community. This whole project is a disgusting waste of tax payers money with numerous surveys of bats and badgers, please put an end to this ridiculous project especially during this financial crisis, yours sincerely
Barbara Burch
