Dear Ms McClean.

<p><b>DRAFT MITIGATION LICENCE APPLICATION STATUS:</b> SUBSEQUENT DRAFT APPLICATION</p> <p><b>LEGISLATION:</b> THE CONSERVATION OF HABITATS AND SPECIES REGULATIONS 2017 (as amended)</p> <p><b>NSIP:</b> A47/A11 Thickthorn Junction</p> <p><b>SPECIES:</b> Bat - Soprano Pipistrelle (<i>Pipistrellus pygmaeus</i>)</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Thank you for your subsequent draft bat mitigation licence application in association with the above NSIP site, received in this office on the 17<sup>h</sup> December 2021. As stated in our published guidance, once Natural England is content that the draft licence application is of the required standard, we will issue a 'letter of no impediment'. This is designed to provide the Planning Inspectorate and the Secretary of State with confidence that the competent licensing authority sees no impediment to issuing a licence in future, based on information assessed to date in respect of these proposals.

### **Assessment**

Following our assessment of the resubmitted draft application documents, I can now confirm that, on the basis of the information and proposals provided, Natural England sees no impediment to a licence being issued, should the DCO be granted.

However, please note the following issues have been identified within the current draft of the method statement that will need to be addressed before the licence application is formally submitted. Please do ensure that the Method Statement is revised to include these changes prior to formal submission. For clarity these include:

Additional dusk or dawn surveys of trees with roost potential will be required in the most recent survey season prior to submission of the formal licence application. A walk over survey should be completed within three months prior to formal submission. The results of these surveys should be included in the relevant Figures and used to inform any changes to the proposed methodology and compensation.

A work schedule should be submitted to show when the licensable actions will be carried out.

Figure E3 should be submitted to show the compensation proposed. If the compensation remains as currently described then the number, location and type of bat boxes should be shown on this Figure.

### **Next Steps**

Should the DCO be granted then the mitigation licence application must be formally submitted to Natural England. At this stage any modifications to the timings of the proposed works, e.g. due to ecological requirements of the species concerned, must be made and agreed with Natural England before a licence is granted.

If other minor changes to the application are subsequently necessary, e.g. amendments to the work schedule/s then these should be outlined in a covering letter and must be reflected in the formal submission of the licence application. These changes must be agreed by Natural England before a licence can be granted. If changes are made to proposals or timings which do not enable us to meet reach a 'satisfied' decision, we will issue correspondence outlining why the proposals are not acceptable and what further information is required. These issues will need to be addressed before any licence can be granted.

Full details of Natural England's licensing process with regards to NSIP's can be found at the following link:

[REDACTED]

As stated in the above guidance note, I should also be grateful if an open dialogue can be maintained with yourselves regarding the progression of the DCO application so that, should the Order be granted, we will be in a position to assess the final submission of the application in a timely fashion and avoid any unnecessary delay in issuing the licence.

I hope the above has been helpful. However, should you have any queries then please do not hesitate to contact me.

Yours sincerely

Gareth Lawler
