

Submission ID: 4082

We write to ask Highways England to relook at their plans which propose to destroy some beautiful tree shelter belts near Honingham Berry Hall - it appears that a minor adjustment to the alignment of the route could move the road through bare arable land rather than removing the protection the shelter belts currently afford to the Grade II listed building and bringing the road nearer to the River Tud a valueable environment. Please take this email as an objection to the proposals currently published 23rd Aug 2021
