

Anglian Water has today provided an updated and final SoCG to National Highways (NH) legal team. There remain a number of points between the parties on the choice NH have on which powers to use for works, the costs borne by Anglian Water for works which it has not chosen to undertake and the consequent impact on Anglian Water's funds to undertake environmental works elsewhere. NH has though confirmed that access to two Anglian Water sites will be maintained 24/7 and so we are seeking that this is included in an agreement so that NH and all relevant contractors maintain that access.
