1 AFFECTED STATUTORY UNDERTAKERS IDENTIFIED

Engagement undertaken with the statutory undertakers		
Statutory undertaker as identified by Regulation 11 list	Engagement	Engagement outcome
Anglian Water	<p>The Applicant has had ongoing engagement with Anglian Water since 2016 to obtain existing stats information, provide details on the Scheme design and obtain information on possible diversion routes required. A refresh of the stats information was carried out in 2018 and again in 2020, to capture updates to the design.</p> <p>The Applicant has exchanged a series of emails with Anglian Water in 2020 to discuss the preliminary design of the scheme, the diversions required, utility corridors, programme and estimates. Anglian Water have been provided with funding to undertake design and site assessments. Budget diversion estimates have been received and design meetings are ongoing on a regular basis.</p> <p>Anglian Water have been consulted over Protective Provisions to be included with the Draft DCO and have provided some further requirements which are being reviewed and discussed.</p>	<p>Early engagement has resulted in beneficial meetings where the Applicant has been able to share preliminary design information and drawings with Anglian Water. This assists AW with their design of the proposed diversion works, and feedback from AW has helped shape some aspects of the preliminary design, particularly utility corridors. These discussions are ongoing.</p>

Engagement undertaken with the statutory undertakers		
Statutory undertaker as identified by Regulation 11 list	Engagement	Engagement outcome
BT Openreach	<p>The Applicant has had ongoing engagement with BT Openreach since 2016 to obtain existing stats information, provide details on the Scheme design and obtain information on possible diversion routes required. A refresh of the stats information was carried out in 2018 and again in 2020, to capture updates to the design.</p> <p>The Applicant has exchanged a series of emails with BT Openreach in 2020 to discuss the preliminary design of the scheme, the diversions required, utility corridors, programme and estimates.</p> <p>BT Openreach have been provided with funding to undertake design and site assessments. Budget diversion estimates have been received and design meetings are ongoing.</p> <p>BT Openreach have been consulted over Protective Provisions to be included with the Draft DCO and are currently reviewing these.</p>	<p>Early engagement has resulted in beneficial meetings where the Applicant has been able to share preliminary design information and drawings with BT Openreach. This assists BT Openreach in their design of the proposed diversion works and estimate. Feedback from BT Openreach has helped shape some aspects of the utility corridors, so that they may avoid 90 degree bends. These discussions are ongoing.</p>
Cadent	<p>The Applicant has had ongoing engagement with Cadent since 2016 to obtain existing stats information, provide details on the Scheme design</p>	<p>The Applicant has had ongoing engagement with Cadent in relation to the strategic Intermediate Pressure gas main which is affected by the</p>

	<p>and obtain information on possible diversion routes required. A refresh of the stats information was carried out in 2018 and again in 2020, to capture updates to the design.</p> <p>The Applicant has held a number of integrated project team meetings with Cadent, in 2020, that have resulted in beneficial discussions and proactive decisions in deciding location of Cadent diversion.</p> <p>Cadent have been provided with funding to undertake design and site assessments. Budget diversion estimates have been received and design meetings are ongoing on a regular basis.</p> <p>Cadent have been consulted over Protective Provisions to be included with the Draft DCO and are currently reviewing these.</p>	<p>Scheme. The Applicant has provided details (including cross-sections) of the proposed works to Cadent. Through discussions with Cadent the Applicant has been able to finalise the proposed diversion route, whilst still considering the needs of the local residents and landowners. Discussions on the design, cost and construction methodology of the diversion route continue, whilst Cadent develop their final design.</p>
UK Power Networks	<p>The Applicant has had ongoing engagement with UKPN since 2016 to obtain existing stats information, provide details on the Scheme design and obtain information on possible diversion routes required. A refresh of the stats information was carried out in 2018 and again in 2020, to</p>	<p>Early engagement has resulted in beneficial meetings where the Applicant has been able to share preliminary design information and drawings with UKPN. This assists UKPN in their design of the proposed diversion works and estimate, of the LV, 11kV and 33kV infrastructure.</p>
