1 Introduction

1.1 Purpose of this document

- 1.1.1 This Statement of Common Ground ('SoCG') has been prepared in respect of an application for a Development Consent Order ('the Application') under section 37 of the Planning Act 2008 ('PA 2008') for the proposed M54 to M6 Link Road ('the Scheme') made by Highways England Company Limited ('Highways England' or 'HE') to the Secretary of State for Transport ('Secretary of State').
- 1.1.2 This SoCG does not seek to replicate information which is available elsewhere within the Application documents. All documents are available on the Planning Inspectorate website.
- 1.1.3 This SoCG has been produced to confirm to the Examining Authority where agreement has been reached between the parties to it, and where agreement has not (yet) been reached. SoCGs are an established means in the planning process of allowing all parties to identify and so focus on specific issues that may need to be addressed during the examination.
- 1.1.4 **This version of the SoCG has been drafted by Highways England based on correspondence with Mr Nigel Simkin & Mr Paul Simkin during the development of the Scheme and records Highways England's current understanding of the matters agreed and not agreed.**
- 1.1.5 **The first draft was provided to Mr Nigel Simkin & Mr Paul Simkin on 15 July 2020. The contents of the first draft were discussed but no formal comments were received. The second draft was provided to the landowner on 3 November 2020 and also submitted for Deadline 1. Comments were received on 10 December 2020, which have been incorporated into this draft. Highways England will continue to work to finalise the contents of this SoCG at the earliest opportunity as the Application proceeds through the Examination process.**

1.2 Parties to this Statement of Common Ground

- 1.2.1 This SoCG has been prepared by (1) Highways England as the applicant and (2) Nigel Simkin & Paul Simkin. (NS, PS or 'Landowner').
- 1.2.2 Highways England became the Government-owned Strategic Highways Company on 1 April 2015. It is the highway authority in England for the strategic road network and has the necessary powers and duties to operate, manage, maintain and enhance the network. Regulatory powers remain with the Secretary of State. The legislation establishing Highways England made provision for all legal rights and obligations of the Highways Agency, including in respect of the Application, to be conferred upon or assumed by Highways England.
- 1.2.3 Nigel Simkin & Paul Simkin are the freehold owners of plots 5/6, 5/7, 5/8, 5/10, 5/11a, 5/11b, 5/11c, 5/11d, 5/11e, 5/11f, 5/11g, 5/11h, 5/11i, 5/11j, 5/12, 5/13, 5/14, 5/15, 5/18, 5/20, 5/22, 6/4 and 6/5 as identified on the Land Plans (Application documents reference 2.2) and in the Book of Reference (Application document reference 4.3).

1.3 Terminology

- 1.3.1 In the tables in the Issues chapter of this SoCG, 'Not Agreed' indicates a final position. 'Under discussion' indicates where these points will be the subject of ongoing discussion

wherever possible to resolve, or refine, the extent of disagreement between the parties. 'Agreed' indicates where the issue has been resolved.

It can be taken that any matters not specifically referred to in the Issues chapter of this SoCG are not of material interest or relevance to Nigel Simkin & Paul Simkin, and therefore have not been the subject of any discussions between the parties. As such, those matters can be read as agreed, only to the extent that they are either not of material interest or relevance to Nigel Simkin & Paul Simkin.

DRAFT

2 Record of Engagement

2.1.1 A summary of the meetings and correspondence that has taken place between Highways England and Nigel Simkin & Paul Simkin in relation to the Application is outlined in Table 2-1.

Table 2-1: Record of Engagement

Date	Form of correspondence	Key topics discussed
28/09/2018	Meeting with PS, TB, RR, SD & AK	<p>Post PRA meeting with PS to discuss preferred route.</p> <ul style="list-style-type: none"> • It is likely that the scheme route would change again. • How access would be maintained between severed fields.
23/10/2018	Meeting with NSJ, TB & AM	<p>Post PRA meeting with NSJ to discuss preferred route.</p> <ul style="list-style-type: none"> • Confirmed unregistered land. • Loss of pools. • Similar queries to previous meeting, more detail required regarding vehicle usage and crossing. • PROW requested to be moved to field boundaries. • NSJ advised there is an Option agreement with Nurton Developments.
11/03/2019	Meeting with NS, PS, AM, AM, BB, & SB	<p>NS & PS advised fishing pools are let out to a syndicate, further details to be provided by landowners.</p> <p>NS & PS indicated that the business was growing, and the current scheme plans would inhibit the business' growth and potential future development.</p> <p>NS & PS have previously been advised by BK and expect BK to advise going forwards.</p> <p>The landowners mentioned due to the loss of one pool through the scheme proposals they would need another pool reinstating or the existing pool would need to be widened.</p> <p>Adjoining land is used for arable farming purposes and often managed by a contractor.</p> <p>It was requested that the proposed bridge must be fit for contractors to pass through with combine harvester, which would be up to 10 metres wide.</p> <p>The adjoining land is also used for clay shooting.</p>

Date	Form of correspondence	Key topics discussed
		There is a possible drainage issue to the south west of the ponds which will require improvements by the Landowner.
12/04/2019	Letter from HE to NS, PS & agent	Letter sent to NS & PS requesting land access by agreement to complete ground investigation surveys.
23/05/2019	Letter from HE to NS, PS & agent	S42 consultation pack. Included Land Interest Plans showing areas of land ownership and areas of land that may be required for the Scheme and the Order limits. The draft Environmental Masterplan was also made available online, indicating initial thoughts on areas required for environmental mitigation.
04/07/2019	Letter from BK to HE	Statutory consultation response received.
03/10/2019	Letter from HE to NS, PS & agent	Land acquisition discussion letter.
11/11/2019	Letter from HE to NS, PS & agent	Supplementary consultation pack sent.
10/12/2019	Meeting with NSJ, PH, IM, BB, NS, AM, RR, JH & SB to discuss supplementary consultation	<p>Review of scheme and update on DCO schedule.</p> <p>IM requested a copy of the General Arrangement plan, both BK and NS were unable to download/print document. JH downloaded and printed copy during meeting ready for BK to take away.</p> <p>NSJ commented that the change in scheme design to leave the second pool is welcomed. NSJ advised that new wooded area (environmental mitigation) is not welcomed east of the proposed route.</p> <p>New access track requested off Hilton Lane (there are currently two access tracks off Hilton Lane, one of which will sever part of the land and one which is not currently used).</p> <p>NSJ requested that the accommodation bridge is big enough for the bridleway and harvest equipment.</p> <p>Plot 5/11a – NSJ advised that some areas will be difficult to farm, and it was queried if the difficult to farm areas could instead be used for environmental mitigation.</p> <p>NSJ queried if new environmental mitigation pond could be handed back to landowners after construction. RR advised this was not possible due to the pond being used for surface drainage and would not be suitable for fishing.</p> <p>IM and NSJ disagree with the number of land parcels required for environmental mitigation and queried if other landowners were affected as badly.</p>

Date	Form of correspondence	Key topics discussed
		<p>NSJ advised that they have vehicular rights through Brookfield Farm.</p> <p>IM and NSJ wanted to make their views known, however, wish to submit formal representations in full. Which will fully establish their position on the scheme proposals.</p>
11/12/2019	Letter from BK to HE	Supplementary consultation response received.
24/01/2020	SoCG introductory Letter sent	Introductory SoCG letter addressing concerns raised within latest supplementary consultation response.
27/02/2020	Meeting with NS and representatives to re-discuss the supplementary consultation in the Landowner's presence (SB, TP, RR, NS, MS, SD, IM, PH & PL)	<p>Introductions</p> <p>PH wished to review the BK supplementary consultation response.</p> <p>The following numbering aligns with BK consultation response and reviewed within the meeting as follows:</p> <ol style="list-style-type: none"> 1. TP explained the reasoning behind the wooded areas, such as environmental mitigation, biodiversity, including some areas which will be for visual screening (properties on Hilton Lane). TP outlined the principles and timeframe for the management of the proposed woodland. NS asked what woodland is being taken out along the scheme proposals as to require the environmental mitigation. TP responded with rationale of woodland taken out from scheme with consideration taken for the full scheme width. 2. RR responded with reasoning (vehicle access required to balancing pond). There is no intention to make the proposed track public, gates would be locked, with dual access to the landowners and Highways England. 3. Assurances requested for retained access of Hilton Lane, to be discussed further with NS & PS. 4. Question raised regarding temporary land requirement. TP responded confirming part of the temporary land requirement would be for soil storage. TP referred to Outline Environmental Masterplan for further information. 5. Proposed wood to embankments. TP advised due to the land gradient of the bank and ground compaction, tree planting would not be possible for both safety and longevity of the proposed planting. The proposed tree planting in the two areas represents biodiversity in both areas, as well as visual screening in one part. 6. RR confirmed and in agreement. 7. RR confirmed and in agreement.

Date	Form of correspondence	Key topics discussed
		<p>8. BK state there is insufficient room for a combine harvester – RR confirmed the bridge has been measured against the diagram of the combine submitted by BK in their supplementary consultation and the bridge would be sufficient.</p> <p>BK advised that even though the bridge was sufficient, BK felt that the bridge is not ‘future proofed’ if machinery was to increase in size over the upcoming years.</p> <p>9. BK advised that some areas of the permanent land take mean the land not required by the scheme are un-manageable and awkward to farm. RR and TP advised this can be investigated and it may be possible to ‘square off’ some of the proposed boundaries to make the land not required by the scheme more manageable.</p> <p>10. TP advised the proposals balancing pool would not be permitted for fishing and would be locked with Highways England access only.</p> <p>11. Action for BK to provide detail of access rights for access through Brookfield Farm</p> <p>12. (a & b) Action for BK to check vehicle rights going over land. SD raised the importance of knowing what rights are affected so that compensation can be applied if applicable.</p> <p>13. TP advised additional hedgerow around permanent/temporary land, can change the field alignment.</p> <p>14. Review of Environmental Statement.</p> <p>Closing remarks:</p> <p>Question raised by PL if surveys occurred outside of RLB. TP advised that surveys have been conducted outside the RLB up to 500 metres.</p> <p>Question raised by IM if Natural England have asked the landowner for their opinion. TP advised Natural England will have followed protocol, which does not include engagement with landowners.</p> <p>Definitive map indicates an official bridleway, NS advised this is incorrect and there have been questions raised over the years between the landowner and the council.</p>

Date	Form of correspondence	Key topics discussed
		<p>Mrs Simkin raised the question where the location of the replacement ancient woodland would be. TP indicated on a plan the area required.</p> <p>PL made note that they had recently requested the environmental mitigation note. TP acknowledged request and advised this was being drafted and would be sent when complete.</p> <p>RR went through next steps of the project and noted draft SoCG would be with the Landowner and their agent in due course.</p>
03/03/2020	Email from SB to PH	Six Highways England handbooks and guidance brochures issued (compensation, property and blight, property and compulsory purchase, property and discretionary purchase, property and land surveys & property and road proposals).
09/03/2020	Letter from HE to NS, PS & agent	S56 – Notifying Persons of Accepted Application.
17/04/2020	Letter from HE to NS, PS & agent	S56 – Notifying Persons of Accepted Application Extension.
01/06/2020	Letter from HE to NS, PS & agent	S56 – Additional relevant representation.
13/07/2020	Email from SB to PH	Issue of Licence agreement for geotechnical equipment left on landholding.
13/07/2020	Email from PH to SB	Confirmation of Licence agreement receipt and will be back in contact after client's instruction.
15/07/2020	Letter from HE to NS, PS & agent	Draft SoCG and environmental mitigation approach sent to Landowner and their agent.
28/07/2020	Letter from HE to NS, PS & agent	Notification of change request.
21/08/2020	Letter from HE to NS, PS & agent	Supplementary consultation consultee letter sent.
15/09/2020	Letter from HE to NS, PS & agent	Follow up letter sent to Landowner and their agent concerning acquiring land by agreement.
05/10/2020	Call from SB to IM	Call to discuss upcoming meeting via Microsoft Teams rather than site meeting to ensure SoCG could be thoroughly reviewed due to not being able to meet indoors due to Covid 19. SB advised telephone invites would also be issued as well as teams invite to ensure all parties were technically able to join the meeting.
05/10/2020	Email from SB and RR	Email from SB & RR with meeting invite to landowner and agent, including follow up of telephone conversation.

Date	Form of correspondence	Key topics discussed
08/10/2020	Meeting with landowners representatives to discuss SoCG issued on 15/07/2020 (SB, TP, RR, RF, SD, IM, PH & PL)	Meeting to discuss and review draft SoCG and environmental mitigation approach.
20/10/2020	Email from SB to PH & IM	Request for update on Licence agreement issued on 13/07/2020 and whether NS & PS will be allowing access for ecology surveys.
21/10/2020	Email from PH to SB	Question raised if Bruton Knowles clients refuse access, does Highways England have the relevant Powers under the Housing and Planning Act 2016 to enter land due to the Scheme not being granted.
22/10/2020	Email from SB to PH	<p>Ecology surveys are required to be undertaken on the land in your client's ownership proposed to be acquired for the scheme as part of ongoing data gathering to inform the European Protected Species Licence applications to Natural England. These licences will allow disturbance of species during the construction stage. No further data is required to inform the DCO submission.</p> <p>If entry cannot be secured by agreement then Highways England could take entry by exercising its powers in the 2016 Act. Highways England is able to exercise these powers at any time in connection with a proposal to acquire an interest in or a right over land. The exercise of these powers is not dependent on the DCO application being made or decided.</p>
03/11/2020	Email from SB to PH	Since previous email, question raised if Bruton Knowles had received confirmation of how their clients wish to proceed.
03/11/2020	Email from SB to IM & PH	Updated draft SoCG issued.
06/11/2020	Email from PH to SB	Update pending, confirmation of full reply by close of play 09/11/2020.
09/11/2020	Email from PH to SB	Confirmation of upcoming survey access refused by NS and PS.
11/11/2020	Email From SB to PH	Following meeting on 08/10/2020 Bruton Knowles advised the project team would receive full comments to the draft SoCG issued on 15/07/2020. Email to request outstanding comments on both previous and newly issued SoCG
11/11/2020	Email from PH to SB	PH advised that outstanding comments would be issued by 13/11/2020.

Date	Form of correspondence	Key topics discussed
23/11/2020	Email from SB to PH	Request for update regarding outstanding comments relating to the SoCG issued on 03/11/2020.
23/11/2020	Email from PH to SB	PH advised comments are in the process of being drafted and will be issued when completed.
07/12/2020	Email from SB to PH & IM	Request for update regarding outstanding comments relating to SoCG issued on 03/11/2020.
07/12/2020	Email from SB to PH & IM	Following access refusal from landowner, email sent with updated survey schedule to confirm if access is still refused based on the updated survey schedule.
10/12/2020	Email from PH to SB	Comments received regarding SoCG issued on 03/11/2020.
15/01/2021	Email from PH to SB	Receipt of signed licence agreement
02/02/2021	Email from SB to PH	Update on Licence fee payment from 2019 surveys Update to advise of upcoming revised SoCG to be issued Request for potential meeting dates to discuss SoCG

2.1.2 It is agreed that this is an accurate record of the key meetings and consultation undertaken between (1) Highways England and (2) Nigel Simkin & Paul Simkin in relation to the issues addressed in this SoCG.

3 Issues

3.1 Introduction and General Matters

3.1.1 This chapter sets out the ‘issues’ which are agreed, not agreed, or are under discussion between Nigel Simkin & Paul Simkin and Highways England.

3.2 Issues

3.2.1 The table below shows those matters which have been agreed or yet to be agreed by the parties, including the date and method by which it was agreed (if relevant).

Table 3-1: Issues

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
Use of land for environmental mitigation	Statutory consultation response	The ecological/drainage feature which is at the bottom of ‘The Prairie’ field. This area suffers with waterlogging. We would challenge the requirement for the ecological mitigation and drainage pond at this location and seek justification for the proposals.	Land is required at this location to minimise flood risk to the wider area and the Scheme. This location has been identified as a suitable location to sustainably manage water, whilst providing some ecological benefit. The low point of the land means that water does already drain in that direction and minimises the need to change landform.	Under discussion	High
	Supplementary Consultation response	We are confused as to your environmental strategy which proposes that the	Planting in this area has been considered, however, the steepness of the engineered slopes of	Under discussion	High

¹ Indication on likelihood that the matter will be agreed by the close of the Examination period as rated by the applicant (app) and the Interested Party (IP). Dark green = agreed, light green = high likelihood of agreement, orange = medium likelihood of agreement, pink = low likelihood of agreement, red = not agreed.

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>embankments to the new road should be species rich grassland. We would propose that the land take is decreased by providing the woods on the embankments which are currently earmarked for 'species rich grassland'. This would ensure that environmental mitigation for the scheme is still provided whilst reducing the land take required (and hence the impact on our clients holding). This approach would also improve the mitigation to reduce the visual impact of the proposals on the surrounding area.</p>	<p>embankments and cuttings are not conducive with the successful establishment of planting. This is due to the level of compaction required to stabilise the earthworks. The steepness of these slopes (1:3), have been designed to minimise the footprint of the Scheme, but would present additional health and safety risks during the maintenance of any woodland planting, which must be considered when identifying areas for mitigation across the Scheme.</p> <p>A separate environmental mitigation technical note was produced and accompanied the draft SoCG issued to the Landowner on 15/07/2020.</p>		
	<p>Landowners' response to review of previous above supplementary consultation within draft 2 of SoCG response</p>	<p>we note that Highway England approach to measuring the population of GCN's across the area has been extremely cautious and appears to significantly overestimate both the number and size of GCN breeding populations within 500m of the road, which we</p>	<p>Natural England Great Crested Newt Mitigation Guidelines (2001) Section 5.2 and 5.4 references a distance of 500m as being the trigger for undertaking surveys for GCN. Section 8 of the same guidelines refers to an area of terrestrial habitat up to 500 m</p>	<p>Under discussion</p>	<p>Medium</p>

		<p>understand is double the required distance.</p>	<p>around a pond being considered as potential newt habitat.</p> <p>Natural England's Method Statement Template for licensing (April 2020) refers to the need to undertake surveys at distances beyond 250 m when certain criteria are met:</p> <ol style="list-style-type: none"> 1) maps, aerial photos, walk-over surveys or other data indicate that the pond(s) has potential to support a large great crested newt population 2) the footprint contains particularly favourable habitat, especially if it constitutes the majority available locally 3) the development would have a substantial negative effect on that habitat 4) there is an absence of dispersal barriers. <p>Criteria 1 is difficult to dismiss, as large sized populations of newts can be found in what could be classified as a poor quality waterbody. The footprint of the Scheme contains particularly favourable newt habitat (deciduous woodland and hedgerows). Large amounts of this woodland and</p>		
--	--	--	--	--	--

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
			<p>hedgerows would be lost during construction. Whilst there are barriers to dispersal beyond 500m, within 500m there are very few. Even the A460 is only a partial barrier.</p> <p>All the criteria were met to warrant surveys beyond 250m. In addition, for projects of this scale it is also considered necessary to gather information to support an assessment of cumulative impacts on GCN populations between the Scheme and other reasonably foreseeable projects.</p> <p>There is no land take associated with mitigation for GCN based on the effect on ponds more than 250m from the Scheme. Using a 250m buffer would not change the areas of compulsory acquisition.</p>		
	Land agent's Relevant Representation – RR-034	Excessive ecological mitigation exacerbates the Projects effect on our client's land as follows; - loss of good quality arable land/severed fields/access routes. - impact upon fishing and clay pigeon businesses. - impact upon riding routes used	Natural England's ancient woodland inventory only lists woodlands over 2ha in size. As such Highways England have assessed whether woodland blocks smaller in size than 2ha could be ancient and therefore warrant appropriate compensation. The assessment has been undertaken	Under discussion	Medium

		<p>by their equestrian business. - loss of income/increased costs. As an example, during the meeting Nigel Simkin expressed his surprise that increased mitigation is required because of an area of existing 'ancient woodland' to the north of his land ownership. Through his own knowledge, this is an area of relatively young trees and furthermore is not designated as ancient woodland on the Natural England website.</p>	<p>with close liaison and agreement with Natural England and has included review of historical maps, and desk and field-based studies to record the characteristics of each of these woodlands. To compensate for the loss or damage of ancient woodland, it has been agreed with Natural England to plant new woodland at a ratio of 7:1 to compensate for that lost. The requirement to provide the compensation planting in connection with existing ancient woodland has limited opportunities to locate compensation planting. The woodland has not been 'designated' as ancient, rather it has been identified as ancient by a fact of its characteristics and historic map regression and as such must be afforded consideration as required by National and Planning Policy any loss must be compensated accordingly.</p> <p>It should be noted that at every stage in the design opportunities have been sought to minimise the impact of the Scheme on ancient woodland. Following the Scheme changes submitted to the Examining Authority on 9 October 2020, there would be no</p>		
--	--	---	---	--	--

			<p>direct loss of ancient woodland. With the loss of ancient woodland being then limited to loss as a result of development within the buffer zone and loss associated with air quality impacts.</p> <p>Notwithstanding the above, it should be noted that the majority of environmental mitigation is not proposed to mitigate the impact on ancient woodland. Mitigation measures located on land held by the Landowner are required to provide a combination of functions, including ecology mitigation with regard to habitats, species and ancient woodland, visual screening and landscape integration. The reason for mitigation measures specific to the Landowner's holdings has been explained in further documentation 'Environmental Mitigation Approach: Nigel Thomas Simkin and Paul William Simkin ' issued to the Landowner on 15 July 2020.</p> <p>The impact on agricultural farm holdings has been assessed and is</p>		
--	--	--	---	--	--

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
	Response to second draft SoCG in relation to above issue	Landowner further disagrees with ancient woodland identification	<p>reported in Chapter 12: Population and Human Health [APP-051/6.1].</p> <p>The area of woodland referred to is recorded on the 1842 OS map and is shown as being continuously wooded from that point onwards. No earlier maps of this area are available. However, with the landform recorded (an increasingly steep ravine) and cohort of woodland flora present this area is considered likely to be ancient woodland. This was discussed and agreed with Natural England as recorded in our Statement of Common Ground with Natural England [APP-221 and subsequent revisions</p>	Under discussion	Medium
	Land agent's Relevant Representation – RR-034	A combination of excessive ecological mitigation and resultant boundaries for land take has left small sections of land that cannot be farmed effectively	Highways England considers, as set out above, that the land take required by the Scheme is proportionate. Highways England disagrees that the land remaining is not capable of being farmed effectively. However, if the remainder of a holding becomes unviable because of compulsory acquisition then any loss due to this would be reflected in any compensation due. Highways England issued guidance documents to the	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
			<p>representing land agent on 03/03/2020.</p> <p>Highways England can only take land which is required for the Scheme. Under the Compensation Code. Highways England is required to pay compensation on any losses where proven and evidence as a consequence of the Scheme.</p>		
	Response to second draft SoCG	<p>The main concern from our clients relates to the red bordered area to the right of the link road (for clarity, this is not the area optioned for mitigation, but the area that falls within the order limits that may be required for temporary work identified as plot 5/11g.)</p> <p>We understand this area will be acquired for temporary possession.</p>	<p>Plot 5/11g is required on a temporary basis. As highlighted with the Statement of Reasons [TR01054/APP/4.1], Highways England require this land to carry out the works numbers; 25, 26, 28, 47 and 70. Details are of these works can be found in sheet 5 of 10 Work Plans [TR01054/APP/2.4]</p>	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		Please could you clarify on this point and provide plans if available?			
	Response to second draft SoCG	There appear to be some anomalies concerning plot numbers as referenced in Statement of Reasons, namely that plots 5/11b, 5/11c, 5/11d, 5/11h, 5/11i, 5/11j, 5/15, 5/18 and 5/20 are referred to in the Statement of Reasons but are not shown in the Draft Development Consent Order. Please can you confirm the reason behind this apparent anomaly?	The dDCO includes compulsory purchase powers for the acquisition of the land shown on the Land Plans (see definition of 'Order Land'). The dDCO includes compulsory acquisition powers (Article 20) and only identifies those plots where the powers are limited to the acquisition of rights (Article 23(2) & Sch 5) or acquisition is only to be permitted temporarily (Articles 29, 30 & Sch 7). By contrast the Statement of Reasons identifies all of the affected land, permanent or temporary, and provides the reasoned justification for its proposed acquisition.	Under discussion	Medium
	Land agent's response to the consultation for	The reduction of the link road's width by 4.2 metres is	The environmental mitigation planting is not proposed on a plot by plot basis such that a reduction in impact on one	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
	the changes to the DCO	welcomed however there appears to have been no reduction in the level of environmental mitigation planned on our client's landholding. In fact, the Environmental Masterplan indicates that there are to be additional hedgerows planted to the east of the link road.	<p>landowner's plot will reduce the mitigation on that plot.</p> <p>A mosaic of habitats has been included across the length of the Scheme but necessarily focused in selected locations to provide connectivity for protected species and designated sites. A reduction in habitat loss as a result of design changes and new survey data has enabled a reduction in the amount of land taken as mitigation from some landowners but not for all.</p> <p>Additional hedgerows have been proposed to provide boundary features for landscape integration and this also provides ecological enhancements on land that will be acquired for other purposes. Those areas are not being acquired for the sole purpose of hedgerow planting, but have been identified to mitigate visual and biodiversity impacts and around the Scheme.</p>		

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>With regards the suggestion there will be a small reduction in the area of ‘ancient woodland’ here, we have reviewed the previous Environmental Masterplan together with the revised Environmental Masterplan and can find no difference or change to the area of ancient woodland identified.</p> <p>Furthermore, we have previously raised that the area shown above has only recently been designated “ancient woodland” through the course of consultation meetings between Highways England and Natural England in relation to the scheme.</p> <p>Our clients dispute that the land is ancient woodland and has noted that the ancient woodland area identified has very young trees (i.e. not over 200 years old). They feel it is</p>	<p>There has been no reduction in the area of ancient woodland identified. Design change 3 (submitted on 9 October 2020) reduces the width of the embankment adjacent to the area of ancient woodland located within Brookfield Farm SBI, which reduces the loss of ancient woodland. The assessment reported in Chapter 8: Biodiversity of the ES [APP-047/6.1] identified 0.0015 ha of ancient woodland which would be lost during the construction of the Scheme, with a further 0.042 ha of ancient woodland located within 15 m of the construction works assumed to be lost due to the potential for root damage at this distance.</p> <p>The design change limits the loss of ancient woodland to 0.029 ha within 15 m of the construction works only. This level of detail is not shown on the draft Environmental Masterplan but is assessed within the Environmental Statement (updated chapter 8 submitted to the ExA on 09/10/20 [AS-083/6.1]). In addition, there is a loss</p>	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>unfair this point has been discussed and decided upon with no input from themselves. This is a particular point of contention for our clients as they have been advised that the excessive tree planting for screening on their land under the scheme is mitigation to compensate for areas of “ancient woodland”.</p> <p>The reduction of the height of the approach to M6 Junction 11 by approximately 0.7 metres would provide negligible benefit to our clients in terms of a reduction in visual/landscape impact, due to the distance from their landholding.</p>	<p>of ancient woodland due to air quality impacts.</p> <p>It should be noted that at every stage in the design opportunities have been sought to minimise the impact of the Scheme on ancient woodland.</p> <p>As part of the biodiversity assessment Highways England has assessed whether woodland blocks smaller in size than 2ha could be ancient and therefore warrant appropriate compensation. The assessment has been undertaken with close liaison and agreement with Natural England and has included review of historical maps, and desk and field-based studies to record the characteristics of each of these woodlands.</p> <p>As noted above, the majority of environmental mitigation is not</p>		

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
			<p>proposed to mitigate the impact on ancient woodland.</p> <p>It is acknowledged that the reduction in height of the approach to M6 Junction 11 would provide negligible benefit to NS and PS in terms of visual impacts.</p>		
		<p>We have reviewed the Environmental Masterplan and our clients are very disappointed that you have reduced the land required for environmental mitigation elsewhere under the scheme but not within our client's landholding.</p> <p>You have advised in the consultation brochure that these proposed reductions in land take are in response to landowner's comments, however you do not appear to have taken our clients views into consideration when making these revisions.</p>	<p>Landscape planting is required to mitigate the impacts of the Scheme on landscape character, visual amenity and biodiversity, both for habitats and species. A mosaic of habitats has been included across the length of the scheme but necessarily focused in selected locations to provide connectivity for protected species and designated sites. The design changes, and new survey data and methodologies has enabled a reduction in the amount of land taken as mitigation, however it is not possible to reduce the mitigation to such an extent that the land take from all landowners could be reduced. As such the extent of land to be acquired from NS and PS remains as previously proposed.</p>	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>It is disappointing to note that Highways England have been able to reduce the environmental mitigation in some areas but still intend to take the whole of our client's landholding.</p> <p>One would assume that the proposed reduction to the environmental mitigation under areas owned by other landowners is an attempt by Highways England to appease these landowners.</p>	<p>Following an assessment of the design changes (accepted by the ExA October 2020) and the results of further ecological surveys, Highways England was able to make a number of amendments to the Environmental Masterplan.</p> <p>Highways England disagrees with the statement that certain landowners have been given preferential treatment. Those areas where mitigation has been reduced were identified as the most appropriate with mitigation in these locations often providing a single function.</p> <p>Following the design changes reductions in these areas was made possible without worsening the impacts of the Scheme. Plot 6/9 is required for a number of purposes as set out in the technical note provided in August 2020 and Environmental Mitigation Approach [REP1-057/8.11]. The highway drainage pond and woodland planting could not be removed or relocated as they would</p>	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
Environmental mitigation	Response to second draft SoCG	<p>Our clients feel that their land could have been optioned for a reduction in environmental mitigation across the Project for the below reasons;</p> <ul style="list-style-type: none"> - GCN presence has been found in only three of the 28 waterbodies that were surveyed, therefore there should be less of a requirement for species rich grassland and other environmental mitigation across the scheme. - Residents of Hilton Lane have visual screening in the form of existing hedgerows and trees behind and in front of their properties, therefore they will not be able to see the link road when it is built. 	<p>no longer provide their proposed functions</p> <p>The licence application and Letter of No Impediment (LONI) issued by NE was based on several assumed populations due to a lack of access to survey in 2018/2019. The scheme masterplan submitted in January 2020 therefore included several groups of ponds and associated terrestrial habitat to mitigate for potential impacts on these assumed populations.</p> <p>The applicant has subsequently been granted access to survey several ponds in 2020 where GCN presence was assumed. No GCN populations were identified in those ponds directly impacted by the Scheme. The number of ecology mitigation ponds has therefore been reduced from 12 to eight to mitigate for the loss of seven ponds and the partial loss of two ponds (1:1 ratio), reducing the area of aquatic and terrestrial habitat proposed. This design change was accepted by the Examining Authority in October 2020. A revised licence application was</p>	Under Discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>The only people who would benefit from the visual screening would be our clients who do not want it on their land.</p> <p>- Our clients land is Land Classification Grade 2 (very good). The loss of high-quality agricultural land is contrary to scheme guidelines and the National Planning Policy Framework.</p>	<p>submitted to Natural England on 29th January 2021.</p> <p>None of the remaining mitigation measures are required primarily to mitigate for impacts of the Scheme on GCN, however the provision of replacement habitat will reduce the impacts on GCN. The purpose of the mitigation measures provided is set out in the document 'Environmental Mitigation Approach' [REP1-057/8.11].</p> <p>Decisions on DCO applications should generally be in accordance with the relevant National Policy Statement (NPS), which for road schemes is the NPS for National Networks (NPSNN).</p> <p>NPSNN paragraph 5.168 requires applicants to consider the economic and other benefits of the best and most versatile agricultural land and, where significant development of agricultural land is demonstrated to be necessary, to seek to use areas of poorer quality land in preference to that of a higher quality. Chapter 9 of the ES [TR010054/APP/6.1] considers the soil</p>		

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
			<p>resources within the Scheme boundary. Section 9.6 of the ES [TR010054/APP/6.1] outlines that through a desk-based review the land within the Scheme boundary is a mixture of Agricultural Land Classification grade 2 (very good quality) with some areas of grade 3a (good quality) and grade 3b (moderate quality).</p> <p>An assessment of the potential effect of the Scheme on soil resources, geology, agricultural land and land contamination is presented in Chapter 9: Geology and Soils of the ES [APP-048/6.1].</p> <p>The area between the M54 and the M6 in this location is agricultural land and there are no potential routes that would have avoided affecting agricultural land. The Scheme results in the loss of best and most versatile agricultural land, but the applicant has sought to use areas of poorer quality land where possible.</p>		

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
Location of proposed attenuation pond	Statutory consultation response	We request that if the drainage pond is to remain that an improved layout so that it mitigates the land lost would be for it to be in an east / west configuration rather than the north / south configuration as proposed.	The balancing pond has been designed to accommodate runoff from the new link road to reduce outfall flows to existing greenfield run off rates. The balancing pond design is the most efficient shape within the Order Limits to cater for the topography of the site adjacent to the link road. Land take requirement were previously set to keep all required land take as close to the scheme as possible. While it is noted that a due to the fall of the land an east-east arrangement may have a slight reduction in land take however this would be outside of the Order Limits and require land take further from the scheme mainline and into the car boot sale site.	Under discussion	Medium
Scheme alignment	Statutory consultation response	Our clients understood that the motorway had moved westwards to save the fishing pool here and are disappointed to note that the scheme now proposes an area of proposed meadow grassland. By the loss of this pool and the end pool which would be under the link	The alignment of the route has been moved to the west as far as possible (approximately 5m) to reduce the impact on the fishing ponds and other stakeholder constraints. The majority of the pool that lies to the east of the link road, within the Order limits, is required temporarily and will be returned to the landowner post-	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		road, our clients submit that it would render the fishing pool business unviable as only two ponds would remain i.e. 50% of its pools and fishing pegs enterprise will have been lost.	construction. Highways England proposes to discuss this at the next meeting with the Landowners.		
Vehicular rights	Statutory consultation response	Our clients have a vehicular right of way from their land into and across adjoining land.	Highways England is not currently proposing to retain this particular access point and will continue to discuss access arrangements with the Landowner. Alternative access routes for agricultural machinery are proposed via the new accommodation bridge to the south of Brookfield Farm. Highways England welcomes further discussions with the landowner to ascertain their access requirements.	Under discussion	High
Retained land access	Statutory consultation response	The scheme seems to include the access track from Hilton Lane to the fishing pools and more generally into our client's land, this is a main access point into the land and the access must be preserved.	Highways England does not intend to take ownership of this access track; however, access is sought to carry out infrequent periodic maintenance to the attenuation pools required for the link road. The access gate is to be retained to prevent public access to the track. Further discussions will be held with the Landowner to agree	Agreed	Agreed

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
	Supplementary Consultation response	We will be losing access from Hilton Lane to this part of the farm and we request an additional access point is provided to enable our client to have easy access to this part of the holding from the road (as is currently the case at present).	<p>access arrangements, maintenance rights and appropriate compensation.</p> <p>The suggested location of a new Private Means of Access would be immediately after the proposed Hilton Lane structure which has a crest curve that would limit visibility on approach. Due to the increased risk of speeding vehicles colliding with the back of any farm vehicle waiting to access the land parcel, it is not recommended that a new Private Means of Access is provided in this location. There is an existing Private Means of Access approximately 100m further west along Hilton Lane which could be reinstated, this will be discussed in further discussions with NS & PS.</p> <p>To be discussed and agreed at the next landowner meeting.</p>	Under discussion	High
	Land agent's Relevant Representation – RR-034	The Simkin Family have several vehicular access routes severed by the Project, not all of which have been	NS & PS have indicated that there are two existing accesses to their parcel from the A460 via Brookfield Farm and at Latherford Brook. Highways England is not currently proposing to	Under discussion	High

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		acknowledged or replaced by the Project.	<p>retain this particular access point and will continue to discuss access arrangements with the Landowner. Alternative access routes for agricultural machinery are proposed via the new accommodation bridge to the south of Brookfield Farm.</p> <p>To be discussed and agreed at the next landowner meeting.</p>		
Nurton Development proposals	Statutory consultation response	<p>Our clients' land is included within an area of land being promoted for commercial development by Nurton Developments and it is important that the road scheme is developed in such a way as to be sympathetic to that proposal, and we confirm that we are also supportive of the representations made by Nurton.</p> <p>In particular The Scheme will potentially have an adverse impact in relation to the Site and the redevelopment of it. It is an established principle that</p>	<p>The land in question is not allocated in the Local Plan and does not benefit from planning permission.</p> <p>Highways England is engaging directly with Nurton Developments in terms of the impact of the Scheme on their interests. Further detail on these discussions is presented in the SoCG with Nurton Developments submitted to the Examining Authority on 3 November 2020 [TR010054/APP/8.8LIU(K)].</p>	Not agreed	Not agreed

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		in the event that any land with potential development value is severed, the density and/or timing of development on the retained land can be seriously and adversely affected.			
	Land agent's Relevant Representation – RR-034	Our client's land is being promoted for commercial development by Nurton Developments. We understand that the Promoter feels (as our client's do) that there has been a singular lack of positive engagement in relation to Nurton's plans, which is a pity in that constructive dialogue would have been in everyone's best interests.	Highways England has engaged with Nurton Developments throughout the process, including meetings and written correspondence, and will continue to do so as appropriate. A SOCG has been drafted with Nurton Developments.	Not agreed	Not agreed
Permanent land take boundaries	Supplementary Consultation response	Precise boundaries of the permanent land take – Your permanent and temporary land take as currently proposed would leave awkward field boundaries. We propose that these are rationalised or	Highways England acknowledges the concerns raised by the Landowner with regard to the usability of their land post construction, evidence-based claims of diminution of value will be considered. The landscape design must account for habitats lost	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>'rounded off' as highlighted on the attached plan. This would improve the efficiency of the agricultural holding and would also mean that environmental mitigation currently proposed elsewhere could be offset by utilising these areas to provide alternative environmental mitigation.</p>	<p>to the scheme along with the existing landscape character of the area and so must include a matrix of habitat types. Highways England will continue to engage with the Landowner regarding the potential for minor amendments to the location of essential mitigation, if possible, as the design develops.</p>		
	<p>Landowner SoCG response to previous Highways England response</p>	<p>"Highways England will continue to engage with the Landowner regarding the potential for minor amendments to the location of essential mitigation, if possible, as the design develops."</p> <p>We interpret this to mean that the design is not in its final form and further amendments can be made to the proposed mitigation on our clients' land, but please could you clarify on this point.</p>	<p>Highways England confirms that the preliminary design is substantially in final form and further amendments to the location of the proposed mitigation are highly unlikely to be possible at this stage.</p> <p>As part of the detailed design process which will follow the preliminary design, it may be possible for very minor amendments to be made to the proposed mitigation provided that any such amendments are substantially in accordance with the preliminary design and the commitments outlined in the Outline Environmental Management Plan approved as part of the DCO and further that any such amendments do</p>	<p>Under discussion</p>	<p>Medium</p>

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
			not result in an outcome which is environmentally worse than that reported in the Environmental Statement and are supported by the Local Authorities and Statutory Environmental Bodies.		
Definition of woodland planting	Supplementary Consultation response	There are two classifications of woodland proposed of LE1 EFB/efd and LE1 EFA. Please can you clarify what the difference is, given that you are proposing both types of proposed woodland adjacent to our retained land.	LE2.1 refers to woodland planting. EFA, EFB and EFD refer to the function of the environmental mitigation. EFA denotes the provision of visual screening, EFB indicates that the mitigation is for landscape integration and EFD represents mitigation for the purpose of nature conservation and biodiversity. Therefore LE2.1 EFB/efd is woodland planting for the purpose of landscape integration and nature conservation and biodiversity. LE2.1 EFA is woodland planting for the purpose of visual screening.	Agreed	Agreed
Attenuation pond usage	Supplementary Consultation response	Could the proposed attenuation pond be utilised by our clients fishing business?	The pond is required for drainage and ecological purposes so fishing will not be possible as this will be owned and maintained by Highways England. This has been confirmed at a meeting with the Landowner.	Agreed	Agreed

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
Justification and extent of temporary land take	Supplementary Consultation response	Extent of Temporary Land – There are some areas of land identified on your Land Interest Plan as ‘land that may be required’. We assume that these areas may have been optioned for access and works compounds while the link road is being built but would request that you provide further clarification on the proposed use of land in these areas.	The temporary land as identified on the land plans is required for material storage as part of the construction works of the Scheme. Any temporary land will be returned in its former condition to the Landowner after the construction of the Scheme.	Agreed	Agreed
Accommodation bridge	Supplementary Consultation response	We understand that the proposed specifications for this bridge is for it to be a 4-metre carriageway with 1 metre either side verge. The accommodation bridge will have to provide future access for modern farm machinery and as it is a public bridleway, access for equestrian use/horses, pedestrians and other vehicles. The width of the combine without the header is 3.99	It is proposed that the traffic width of the structure is increased to 4.5m in order to accommodate the specified farm machinery. The raised verge will be reduced accordingly to retain the overall size of the upper structure. Sufficient forward visibility is provided on either side of the structure therefore it is anticipated that users will wait on either side of the structure for the other to pass to eliminate the risk of vehicles and users crossing on	Not agreed	Not agreed

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>metres which under the current proposal allows 5cm either side kerb to kerb. This on its own renders the current proposed structure insufficient. The width of the structure also needs to allow for the fact that it is a public byway and is therefore frequently used by third parties, if the bridge is of an insufficient width this will have future health and safety implications. In short, the accommodation bridge needs to be wider.</p>	<p>the structure causing potential conflicts.</p> <p>The route to the accommodation bridge has been designed to ensure that excessive gradients are not required to facilitate movements of agricultural vehicles and users of the diverted Public Right of Way.</p>		
	<p>Land agent's Relevant Representation -RR-034</p>	<p>As mitigation for land access and footpath severance, the Project proposes to provide an accommodation bridge to allow access for farm vehicles and pedestrians. It was highlighted in the meeting by Nigel Simkin that this bridge will also be required for equestrian use as part of a diversion for a bridleway, a point which Highways England would have</p>	<p>In accordance with The Road Vehicles (Authorisation of Special Types) (General) Order 2003, PART 3 SPECIAL VEHICLES FOR AGRICULTURE Section 21.2; The overall width of a special type agricultural vehicle together with the width of any lateral projection or</p>	<p>Not agreed</p>	<p>Not agreed</p>

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>been aware of had they consulted fully. The proposed specifications for this bridge are important. In our client's opinion, the proposed carriageway of 4.5 metres with a 1.25 metre verge either side is inadequate and unsafe, given that various uses of the bridge can occur simultaneously. This bridge also needs to be future proofed, as the proposed width is barely sufficient for the existing combine. As agricultural equipment is becoming larger, our client's view is that the current design of the bridge is inadequate to accommodate both current and future use. In short, the bridge needs to be wider.</p>	<p>projections of any load carried on it must not exceed 4.3 metres.</p> <p>It is proposed that the traffic width of the structure is 4.5m in order to accommodate the maximum legal width of farm machinery. Note that this paved width has been increased, from 4m, following previous engagement with the Landowner.</p> <p>Sufficient forward visibility is provided on either side of the structure, therefore it is anticipated that users will wait on either side of the structure for the other to pass to eliminate the risk of vehicles and users crossing on the structure causing potential conflicts.</p>		
	Further comment within second draft SoCG	The bridge may be utilised by a combination of users at any given time, therefore needs to be wide enough	Highways England notes the landowners request for a bridge width of 6 metres, which Highways England is unable to accommodate. The width has previously been increased from 4	Under discussion	Low

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		<p>to accommodate multi use of vehicles, pedestrians and horse riders. We feel the carriageway should have been designed to a minimum of 6 metres to accommodate this.</p>	<p>metres to 4.5 metres following previous landowner engagement.</p>		
<p>Shared access rights along fishing pool</p>	<p>Supplementary Consultation response</p>	<p>Proposed rights along 'Fishing Pool'; We note that the updated Land Plan proposes that HE acquires rights of access (which we assume are vehicular) along the access track to our clients Fishing Pools. We would be grateful if you could clarify what rights you are proposing to acquire in this area?</p> <p>If it is being proposed that this track is being used by HE they will need to upgrade it to an appropriate standard and maintain this in perpetuity. HE will also need to compensate our client for the access rights</p>	<p>Highways England requires infrequent access to carry out periodic maintenance to the attenuation pools required for the link road. Currently it is anticipated that access for maintenance would be required around every 6 months for periodic clearing and checking of the asset. Emergency access may be required in the event of an oil or fuel spillage on the carriageway to clear the pollution control device, but this is anticipated to be very infrequent. The access gate is to be retained to prevent public access. As such, Highways England do not consider it necessary or justified for Highways England to acquire or upgrade the access track. Nor is it necessary for Highways England to maintain the access track</p>	<p>Under discussion</p>	<p>Medium</p>

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		that you are seeking to acquire here.	in perpetuity. Compensation will be payable in respect of the acquisition of any rights over the access track by Highways England.		
Impact of land acquisition	Taken from the landowner's Relevant Representation – RR-027	I am a landowner directly affected by the scheme and feel that Highways England have little to no regard to the devastating impact it will have on our farm. We feel the road is not required and land that has been farmed for generations in our family will be destroyed. The impact it will have on our lives, home and business will be catastrophic.	<p>Highways England fully appreciates the position of the Landowner and recognises the impact of compulsory acquisition on Landowners.</p> <p>Highways England has taken into account the impact of the Scheme on landholdings throughout decision making processes and optioneering. Details of optioneering processes are set out in Chapter 3 of the ES [APP-042/6.1].</p> <p>The Scheme has been established as a key infrastructure priority through its identification in the Government's Road Investment Strategy 1 and we</p>	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
			<p>consider that its delivery has significant benefits for the sub-region.</p> <p>Compensation for the acquisition of the Landowner's land will be provided in accordance with the Compensation Code.. Highways England has met with the Landowner on a number of occasions to discuss the developing scheme and a SOCG has been drafted. Highways England will continue discussions during the Examination and will provide further updates in due course.</p>		
Engagement with Highways England	Land agent's Relevant Representation – RR-034	We feel we should point out that there has been a lack of consultation by Highways England and our clients feel they have not received meaningful responses about their concerns (letters sent by Bruton Knowles - 3rd July 2019 and the 11th December 2019). The lack of proper engagement has made our clients feel as if their concerns are of little importance, with	Highways England has engaged with the Landowners and their representatives throughout the development of the Scheme, including five face to face meetings in addition to letters, emails and phone calls. The Landowners were consulted as part of the s42 consultation in May 2019 and the supplementary consultation in November 2019. Highways England's responses to the consultation comments are provided in Annex P of the Consultation Report [APP-039/5.2] submitted as part of the Application	Under discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		Highways England's priority being Project delivery.	and discussed at meetings on 10/12/2019 and 27/02/2020. Highways England issued a draft SoCG to the Landowners on 15/07/2020, to which no formal response was been received.		
Landowner consultation	Draft 2 - SoCG response	Highways England were unavailable to meet on the 6th October therefore the meeting was rescheduled for the 8th October 2020. However Highways England advised on the 5th October 2020 that they would prefer to have an online meeting via Microsoft Teams. Nigel Simkin had had to cancel other plans for the meeting on the 8th October 2020 and was disappointed that the meeting had been moved to an online meeting at the last minute – an email was sent to him the day before with joining instructions but neither himself or Paul Simkin had the facility or availability to join the	Highways England was not able to meet indoors as scheduled due to Covid 19 government guidelines. Due to the size of the SoCG document, Highways England suggested it would be advisable to review the document using Microsoft Teams rather review on site which the landowners agent agreed to. Highways England also provided telephone dial in details to the landowners' agent on 05/10/20 for the landowner to use should they not have the technology to join the online meeting as discussed on the phone and recorded via email with the land agent on 05/10/20.	Under Discussion	Medium

Subject	Document	Landowner Comment	Highways England Response	Status	Agreement likely ¹
		online meeting, especially at such short notice.			
Engagement with Highways England	Land agent's Relevant Representation – RR-034	Why did ecologists in undertaking their technical work not approach The Simkin's? The Simkin Family have farmed this land for more than 100 years and therefore the Project could have benefited from their knowledge and in turn this could have mitigated the impact on land take.	The assessments reported in the ES need to be informed by up to date data gathered through desk studies and field surveys to ensure that the assessment of potential impacts on important ecological features and the mitigation required to address these impacts is robust. Whilst Highways England appreciates that landowners will have knowledge of the land that they own, this does not replace the need to undertake these studies. Standard practice does not require landowners to be contacted to provide survey data.	Under discussion	Medium
Construction	Land agent's response to the consultation for the changes to the DCO	(With regards to Change 4) The consultation brochure advises that there will be a reduction in the construction programme of approximately 6 months which would be welcome, however it is not clear if this reduction affects	Design change 4 (as submitted to the Examining Authority on 9 October 2020) involves works at M54 Junction 1 and would reduce the overall construction programme by six months. As the scope of works in the vicinity of the Landowners have not changed, the programme of works in	Under discussion	High
