I would like to suggest an accompanied site inspection at Shoulder of Mutton Farm, Easton Lane, SO21 1DQ. The domestic borehole is sited in the paddock opposite White Hill Cottage, with access via a gateway at the point where Easton Lane becomes Bridleway 502. As the owners of this property we are concerned about potential contamination of drinking water due to its close proximity to the proposed infiltration basin. We are also aware that Bridleway 502 will be used by construction traffic which may impact access to our land and borehole via this gateway, as well as restrict access to local amenities during construction.

I would suggest that unaccompanied site inspections could be made to Itchen Valley Footpaths 20, 21, 22, 49, 52 and Restricted Byeway 19, to ascertain the impact that the construction works will have on these Rights of Way and also access to property along Long Walk, particularly Fulling Mill.
