

Submission ID: 16244

The Examination Procedure has been reviewed including relevant appendices.

Regarding Annex C, the initial assessment of principal issues is comprehensive and covers the key topics for discussion. Winchester City Council (WCC) will expand upon these topics in the Local Impact Report and look forward to further discussion.

The timetable within Annex D is acceptable.

For Items 17 and 18 (issue specific hearings), WCC would wish to see a Hearing dedicated to the following:

- discussions on climate change, specifically the impact of the carbon footprint and other climate changing greenhouse gases generated.
- Related air quality (to consider both impact and the role of mitigation) and an exploration of the mitigation methods that could be employed.
- Discussions concerning the impact on communities outside of the boundary of the application may also be required to discuss any alterations to local traffic flow and amendments to light signals controlling traffic.

WCC will cover these matters in detail within the Local Impact Report.

WCC support the use of hybrid participation methods as this allows more people to contribute to the process.
