

Submission ID: 6851

Mr BJ Ford as both an Interested Party and Affected Person submits the attached plan showing suggested locations for the proposed Site Inspections.

This locations will highlight the importance of maintaining both agricultural and residential vehicle access via Cowley Wood Lane or ensuring that an alternative route is created that allows for large agricultural machinery to easily enter and exit Mr Ford's retained land.

The proposed site locations will also demonstrate the excessive footprint (18 acres) of the proposed compound on Mr Ford's land.

The proposed site locations will enable attendees to view the DCO boundary to the north of the new access road and the proposed tree planting which is some distance from the new road, out of keeping with the scheme requirements and has not been consulted on.
