

Submission ID: 8022

The College strongly supports Highways England's plans for this road improvement. It will provide much greater safety and reduced journey times (with accompanying reductions in carbon emissions) for our staff and students.

Our only 2 asks are a) that Highways England engages with our students so that those studying construction and geography can visit the project and b) that the minor road north continues beyond the Golden Heart PH at Nettleton to Birdlip (rather than being curtailed and restricted just to bikes and cycling) to enable this magnificent coaching inn on the site or earlier Roman inns to continue its trade for another 2000 years or so.
