

Appendix to Deadline 4 Submission

This is to remind the ExA of the devastation Option 30 will cause, all the trees and hedgerows with their abundant wildlife and long established eco systems would be destroyed. I would most respectfully request that they view the site and whole area and also drive all the local lanes to understand the impossibility of adding more traffic.

Pic. 1 The lane through Stockwell Farm as it is now, the farm extends for several hundred acres in all directions from this point where the road would run and it would have passed through and destroyed 2 other small farms before reaching Stockwell

Pic 2 This is what it will become with Option 30, the lane would be the over bridge spanning devastated farmland, with a second needed 700 meters to the right to reconnect the severed farm

Pic.3 Option 12 would widen the existing A417, a boundary of Stockwell Farm in both directions, in part using wide verges left for the purpose c25 years ago and owned by Glos.CC, taking a small amount of extra land but leaving the farm and all wildlife intact, thus saving the massive cost of Compulsory Purchase and 2 over bridges
