Dear Oliver,

As discussed yesterday, there are two parts that need to be addressed before I am able to withdraw the holding objection/register of client's interest. You are already aware that Fisher German act on behalf of Severn Trent in this matter. For clarity, my client does not wish to object unnecessarily, and the nature of the objection is in the interest of protecting its assets and statutory function whilst the details are agreed.

From a practical/diversion element - I understand that Severn Trent have progressed the C4 quotes for the majority of the diversions, although may be subject to a price review between the parties. The affected assets should therefore be known to National Highways (I do not have a note of the plot reference number and/or works number for each of these).

From an asset protection element – I am unable to confirm whether the Protective Provisions Agreement within the dDCO is satisfactory and am liaising with Severn Trent legal to confirm next steps. I understand your legal team are also following this up.

Once I hear back, assuming the provisions are satisfactory, or if not, required amendments are made and agreed – my client should be in a position to withdraw it's holding objection in short order. I will forward a .pdf of this email to the planning inspectorate in response to their Rule 17 letter, dated 25th April 2022 and trust you will liaise over the detail.

Regards,

Richard

Good afternoon Richard,

Following our call last week, please could you confirm if you received a final response from the safeguarding team at Severn Trent?

Also, please could you confirm when PINS will be informed that Severn Trent will be removing their holding objection. This is now critical to the examination.

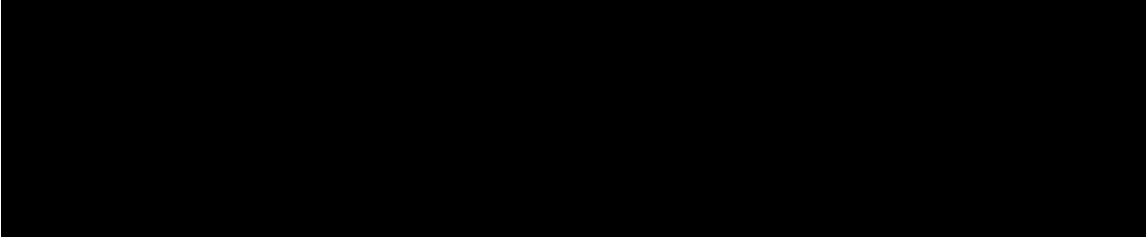

If you could come back to me on those two points before the end of the week, I would be most grateful.

Kind regards,

Oliver

Thank you for your time this afternoon Richard,

As discussed, I understand you are waiting for final confirmation from Severn Trent's asset protection team to remove the holding objection. If you could let me know when this can be done I would be most grateful.

Also as mentioned, please see the attached email chain to regarding National Highways attempts to contact Severn Trent regarding protective provisions. If you could follow this up with your clients and that someone could make contact with [REDACTED] we can then get the matter progressed.

Have a good easter.

Kind regards,

Oliver

Good morning,

Please find attached the DWG file showing the land take for the scheme as requested on 9th March.

If you could let me know when you have had a chance to review, I would then welcome the opportunity to quickly run through the land take and any concerns you have from your clients perspective.

Kind regards,

Oliver
