**Subject:** Rule 6, Procedure Deadline B

Dear Candice,

In accordance with Rule 6 guidelines the following note is intended to form part of deadline B submission and I would appreciate your assistance in making available to the ExA for consideration.

In providing representation for Northgate Farm residence I am writing to follow-up an issue raised in the first preliminary meet on the 15<sup>th</sup> December. In the meeting I raised a concern highlighting that there are a number of key details that are still unknown in the proposed plans which will, once known, influence how we respond to the Examination process. To further illustrate the point I made reference to the 24 Land acquisition queries raised in July that remain outstanding. In addition, we are still awaiting a response to various submissions made in May which included a paper on the PIER document. Although this continues to be a concern I have since had a positive discussion with Highways England and have agreed an expedited plan to fill in the missing details and queries. I am hopeful that this will allow a more informed response to the Written Representation submission and the rest of the Examination process.

Thanks for your assistance.

Kind regards

Mark Hawes
