

The National Highways Environmental Statement Human Health Baseline and Impacts Sheet 1 of 3 implies a positive health impact in Hatfield Peverel, but this must be considered against the modelling outcomes for Air Quality, which indicates a deterioration of Air Quality at all sensitive receptors including locations along The Street Hatfield Peverel as a result of the scheme, if approved. Read in isolation the Impacts Sheet might lead the reader to wrongly conclude that Air Quality is going to improve when the true overall outcome is a worsening of Air Quality in Hatfield Peverel.
