Hello,

I am a director of the company that currently owns the BP at Rivenhall South.

Can this site be reconnected to the new A12 route if it is decided that it is to be widened via a new single access slipway on the northbound route and the wider land reallocated to use as a truck stop for 50 heavy goods vehicles?

We have so few truck stop services on this route and it would greatly serve all to reuse an established trading service station that is not obsolete.

Please call me to discuss.

Kind Regards,

Lewis Trevellyan
