

Submission ID: 13119

Attached is a photograph of St Mary's Rokeby Carol Concert held on Monday 19th December 2022 showing the community support for this Grade II* church adjacent to which the applicant proposes an underpass for the relocated Rokeby junction on the A66 "The Black Option" which we believe will cause "Substantial Harm" to the protected Church. This is in contrast to the Owners preference for "The Blue Option" which would place the junction well away to the east of the Church and have much less adverse affect on the building and its use for those activities shown without any long term harm to the Rokeby Registered Park and Garden.
