Dear Mr Allen,

**A66 Northern Trans-Pennine Project: Application for Development Consent (“DCO application”)**

**Submission made by the Applicant at Deadline 4**

Further to the Rule 8 letter dated 8 December 2022, please find below a list of documents which form part of the Applicant’s submission at Deadline 4 of the Examination of the DCO application:

1. Applicant’s Response to the Examining Authority’s Written Questions (Document Reference 7.24).

**Additional Submissions**

As discussed at the first round of hearings and/or confirmed by the Applicant at Deadline 1,2 and/or 3, and/or submitted in response to comments made by Interested Parties, the following other documents are also submitted and comprise the remainder of the Applicant’s submission at Deadline 4. We have outlined in the table below a brief summary of the reason for the submission in each case:

<b>Document Reference</b>	<b>Document Title</b>	<b>Reason for Submission</b>
1.7 (Rev 4)	Application Document Tracker	An updated version of the Application Document Tracker submitted at Deadline 3 to reflect the status of documents at Deadline 4.

2.7 (Rev 2)	Environmental Management Plan Annex C3 Scheduled Monuments Method Statement (Clean)	<p>It was identified in Historic England's Written Representation submitted at Deadline 1 (REP1-026, Appendix 3) that the scheduled monument known as Brougham Fort is conflated with another scheduled monument known as "Settlement 1/3 mile (540m) ENE of Brougham Castle". Revision 1 of the Annex C3 Scheduled Monuments Method Statement referred to both as '<i>Brougham Roman fort (Brocauum) and civil settlement and Brougham Castle</i>' and these were given record number 02-0002.</p> <p>This document has therefore been updated in Revision 2 to reflect that these are two separate scheduled monuments.</p>
2.7 (Rev 2)	Environmental Management Plan Annex C3 Scheduled Monuments Method Statement (Tracked)	
3.3 (Rev 2)	Environmental Statement Figure 10.9 Viewpoint Photomontages	<p>This revision is submitted to address a point raised by the Friends of the Lake District who identified in their written representation submitted at Deadline 1 (REP1-067) that Photomontage 4.7A had not been included. This Figure has therefore been updated in Revision 2 to include this photomontage. Importantly, this does not affect the assessment. Photomontage 4.7A has been provided to demonstrate the mitigation effects of the landform, effectively screening the junction close to the British Gypsum Works from Sandersons Croft. This is a Type 3 Visualisation as the scheme model is hidden by the landform.</p>

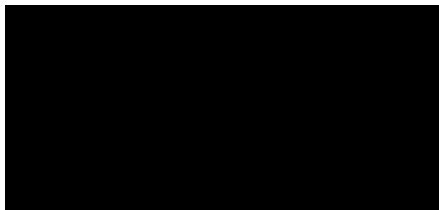

3.4 (Rev 2)	Environmental Statement Appendix 5.4 Air Quality Assessment Results (Clean)	After the submission of the Chapter 5 Air Quality Assessment with the DCO application, an error was identified within the ES Appendix 5.4 AQ Assessment Results. The error related to the incorrect transposition of data from the construction phase modelling results calculations into the final summary reporting tables. This correction has no material impact on the assessment and the overall conclusions remain unchanged. In their Written Representation (REP1-021), Durham County Council also requested to see the NOx concentrations at the ecological receptors, to identify how the receptors for nitrogen deposition levels had been screened. This has been added in the two new tables shown in the revised document.
3.4 (Rev 2)	Environmental Statement Appendix 5.4 Air Quality Assessment Results (Tracked)	
3.4 (Rev 2)	Environmental Statement Appendix 8.10 Impact Assessment Table (Clean)	Historic England identified that the asset counts did not match the numbers in the headline text of Revision 1 of this document. The Applicant reviewed the numbers and provided Historic England with revised headline counts to assist the preparation of their Written Representation, and which were referenced in Historic England's Written Representation (REP1-026) submitted at Deadline 1. The Applicant has therefore made this correction in Revision 2 of Appendix 8.10 submitted at Deadline 4 to ensure the correct headline counts are reflected in the submission
3.4 (Rev 2)	Environmental Statement Appendix 8.10 Impact Assessment Table (Tracked)	

		documents. Importantly, the content of the tables remains correct.
3.4 (Rev 2)	Environmental Statement Appendix 10.6 Schedule of Visual Effects (Clean)	Submitted following the Applicant's commitment stated in 7.8 Applicant's Response to Written Representations made by other Interested Parties at Deadline 1 (REP2-017), submitted at Deadline 2, and to now include the assessment of Viewpoint 4.22.
3.4 (Rev 2)	Environmental Statement Appendix 10.6 Schedule of Visual Effects (Tracked)	
7.25	Tree Loss and Compensation Planting Report	Submitted following the Applicant's commitment stated in 7.3 Issue Specific Hearing 2 ISH2 Post Hearing Submissions (including written submissions of oral case) (REP1-009), as outlined under Agenda Item 3.5.
7.26	Statement of Significance of Human Health Effects	Submitted following the Applicant's commitment stated in 7.9 Applicant's Comments on Local Impact Report (REP2-018), submitted at Deadline 2, in which it was identified under Section 2.8 that the Human Health aspect of the assessment in Chapter 13 of the Environmental Statement did not assess the likely significant effects (as per DMRB LA 112). The findings of the Supplementary Statement do not alter the assessment findings or mitigation requirements outlined in the Environmental Statement.
7.27	Applicant's Response to Deadline 3 Submissions	The Applicant has reviewed the submissions made by Interested Parties at Deadline 3 and has responded to those submissions where new matters have been raised or where clarification of a

		point would be beneficial. Where a matter has been addressed previously it is not responded to in the document.
7.28	Viaduct Visualisations Technical Note	Submitted following the Applicant's commitment stated in the Applicant's Deadline 1 Submission – 7.3 Issue Specific Hearing 2 (ISH2) Post Hearing Submissions (including written submissions of oral case) (REP1-009), as outlined under Agenda Item 3.1. To clarify, please note that Viewpoint C has now been removed, please refer to the Viaduct Visualisations Technical Note for further details.
