---

Good Morning

Living very near to the proposed route and particularly after a very wet spell which has flooded my fields I am very concerned about loss of good farming land from an inevitable increase in water run off.

Secondly the 50 mph speed limit imposed on this stretch has resulted in a big drop in accidents. Could speed cameras not be put in place. Kirkby Thore has benefitted from their installation.

Please consider the environment when planning fine details. Travelling to Birmingham we are given 50mph speed limits for air quality which must be given priority over a minimum reduction in any journey time.  
With kind regards
