1. Introduction

- 1.1.1. This document has been produced in response to the Examining Authority's (ExA) Procedural Decision following Issue of Acceptance Decision (PD-005), dated 9 February 2024, requesting the submission of visualisations depicting the Proposed Development.
- 1.1.2. Six viewpoint locations have been selected in consultation and agreement with the Joint Councils to produce visualisations to show changes which will be experienced by typical visual receptors of the Scheme. The verified views have been prepared following The Landscape Institute's Technical Guidance Note 06/19 A Visual Representation of Development Proposals. The images presented are of views in winter, because this is the season when vegetation offers the least screening, and therefore represents a 'worst case'.
- 1.1.3. For each viewpoint, three images are presented:
- The existing view
 - A verified view for Year 1 (opening year)
 - A verified view for Year 15 (when the proposed planting will be taking effect)
- 1.1.4. The viewpoints are presented in five separate documents. All the viewpoints are shown on the Viewpoint Location Plan which is included in each document.
