LIST OF TABLES

Table 1.1 Calculated noise levels for dwellings – $L_{A10,18h}$ noise index	1
Table 1.2 Calculated noise levels for other sensitive receptors – $L_{A10,18h}$ noise index.....	184
Table 1.3 Calculated noise levels for dwellings – L_{den} and $L_{night,outside}$ noise index	185
Table 1.4 Calculated noise levels for other sensitive receptors – L_{den} and $L_{night,outside}$ noise index	367

Appendix 11.5 Operational noise calculation results

1.1 Introduction

- 1.1.1 This appendix provides the calculated noise levels and derived effects for all sensitive receptors within the noise study area. These are the residual effects for the mitigated scheme, where the mitigation is described in Section 11.9 of Chapter 11: Noise and Vibration of the Environmental Statement (TR010064/APP/6.1).
- 1.1.2 The calculated noise levels are for 4m above local ground unless the building is only one story where the noise levels are calculated at 1.5m. The calculated levels for outdoor community facilities are calculated at 1.5m.
- 1.1.3 The façade of the building used to calculate noise change has been chosen in accordance with paragraph 3.53 of Design Manual for Roads and Bridges LA 111 (Highways England, 2020). This façade is chosen as follows.
- The façade with the greatest magnitude of noise change
 - Where the greatest magnitude of noise change is equal on more than one façade, the façade experiencing the greatest magnitude of noise change and highest do-something noise level.
- 1.1.4 For outdoor locations, including footpaths, and public open spaces the assessment location has been selected to represent the closest part of each of these areas to the main road traffic noise sources.
- 1.1.5 Table 1.1 provides the $L_{A10,18h}$ dB (UK daytime road traffic noise index) for dwellings, and Table 1.2 for other sensitive receptors, as façade noise levels. The dwellings and other sensitive receptors are shown on Figure 11.2 Noise Sensitive Receptors of the Environmental Statement Figures (TR010064/APP/6.2). The following assessment changes are also shown in these tables:
- Short term: Do-Minimum (DM) opening year compared against the Do-Something (DS) opening year
 - Long term: DM opening year compared against the DS future year
 - Non-project: DM future year compared against the DS future year
- 1.1.6 Table 1.3 provides the L_{den} and L_{night} noise levels for dwellings and Table 1.4 provides these for other sensitive receptors. The calculated noise levels are shown in this index to assist Chapter 12: Population and Human Health of the Environmental Statement (TR010064/APP/6.1).
- 1.1.7 Acoustic terms are explained in Appendix 11.1: Introduction to Acoustics of the Environmental Statement Appendices (TR010064/APP/6.3).

1.2 Operational noise calculation results

- 1.2.1 This section provides the operational noise calculation results.

Dwellings – $L_{A10,18h}$ noise index

- 1.2.2 Table 1.1 provides the predicted $L_{A10,18h}$ dB (UK daytime road traffic noise index) façade noise levels.

Table 1.1 Calculated noise levels for dwellings – $L_{A10,18h}$ noise index
