

Wholly object to the expansion of Luton airport.

In Dagnall, you cannot hear your tv indoors with the windows/doors open due to the sound of aircraft. Which is especially bad in the summer months when it is too hot to have window closed. Disturbance of sleep from night flights is also a problem.

Air traffic has been increasing year on year as more and more expansion plans are approved along with the increase of road traffic on the B4506 when heading to/from the airport. The Bedfordshire Council, do not object, of course, and always allow expansion with no regard for residents, as they benefit financially. The people's voice is not being considered. It seems it is always a lost cause from start to finish despite all the publicity to "have your say" if you object.
