

As a local resident I don't want to lose the green space to the expansion of an airport that is not needed or wanted. It will generate more traffic on the already busy roads, and people parking everywhere waiting to pick up people, this is already an unacceptable inconvenience to local residents, that is not managed. Also I walk my dogs everyday over the fields and there are many others use the space to run, walk, cycle, play or just generally enjoy nature, this will all be destroyed and lost to greedy development. The airport has already cut down a lot of shrub land around its perimeter that has caused so much of the wildlife to be lost, and also used to muffle a lot of noise, now you want to generate more noise that is unacceptable to local residents.
