No airport in the uk/world should be allowed to expand.There is a climate crisis,we owe it to our future generations to do this now before it is too late.
We should be encouraging people to fly less not more,we should be investing in our railways and reducing those cost of fares.
We as a country (UK) should be making a statement to the world by not allowing expansion of any Uk airport.
There should be a frequent flyer tax to discourage people to fly.
