

Deadline 1: Provision of suggested locations and justifications for an Accompanied Site Inspection (ASI) for consideration by the ExA (if held).

I'd like to invite the ExA team to visit our home to experience the full impact of noise and air pollution. We live directly beneath the landing flightpath when the wind is from the east. It's impossible to have a conversation in the garden when planes go over. The Application will further aggravate the noise and air pollution problems. My [REDACTED] and there will be a large increase in air pollution. Technologies such as battery powered or hydrogen fuel cells will not counter either of these two harmful effects in appropriate timescales for commercial viability. Important: Please arrange a visit when the wind is from the East.

My Unique Reference is LUTN-S574234. Please do NOT make public the personal and medical data in this submission. Our address is [REDACTED], and my telephone number is [REDACTED] - please do not publish this or my [REDACTED].
