

London Luton Airport Expansion Project Team

Letter to Planning Inspectorate for inclusion in deadline 1 responses.
Unique Ref: LUTN-S578079

As per our conversation at the meeting on Friday 11th Aug 2023 can you please add this response to the file for the DCO for the LLA Expansion Project.

I am fully opposed to any expansion of the London Luton Airport for the following reasons:

The current level of flights / passengers generate enough noise and pollution to raise this to nearly double the amount would be unbearable.

I currently have to clean off the soot and grime from my patio table in the garden every day with the cloth becoming black every day, this only gets worse during the summer months when the airport is busier.

I am against any increase in the night flights as they currently wake me each night with the excessive noise from the plane engines, to have this happen to an even greater amount would affect me greatly and only exacerbate my health problems even further.

I do not believe that the statements and statistics etc given by LLA in their application can be substantiated or will be able to be achieved.

I also feel that any expansion to any airport should not be allowed for all the reasons that are well documented with regards to climate change and the detrimental effects they have on the population and planet which I believe is why many government and institutional bodies are advising the UK government to stop all UK airport expansions.

I am totally against any expansion of London Luton Airport in any way.
