

Dear Sirs

We are opposed to the airport expansion for the following reasons:

1. Increase in noise which we fear will not be solved or reduced as a result of the planning conditions. This noise will cause disturbance to our residents and a deterioration in living conditions in Luton.
2. The increase in traffic due to greater passenger numbers, and disruption to traffic due to construction will cause greater emissions and environmental damage, and will cause disruption to our residents.
3. The increase in carbon emissions and air pollution that will result from the airport expansion is contrary to Government policy and will be detrimental to local health and contribute to climate change.
