

I am writing regarding the letter I was sent about Proposed London Luton Airport Extension Project. As long as I understand how important it is for the local area and for the investors, it is not in my best interest at all. It will have a huge impact on me myself and my family wellbeing. More pollution, more noise and many more problems coming with this project.

It just make me feel anxious thinking about this. London Luton Airport has already expanded since I moved here. The noise and pollution is something obvious.

I cannot watch tv, listen music or even talk on the phone with windows open. Even with the windows closed I can still hear noise coming from airplanes. Adding to that the windows are covered with the " air pollution " coming from airplanes mostly. I have not even mentioned about the car pollution which is going to be even worse.

Most recently we all were affected just because there was a fire on one of the storage car park at the London Luton Airport. Horrible air pollution. Who knows what else might happens in the future.

Me and my family future health and well being is my priority.

This is why my question is what kind of compensation are you expected to provide to individuals?

This is long lasting project and it will have huge impact on me and my family health and well being.

I am waiting for a sensible response.

I am writing regarding the proposed London Luton Airport Expansion Project. Section 56 Planning ACT 2008

The impact for the environment will be massive.

Air pollution, noise etc. Which will have huge impact on health and well being people who would be affected by that, this includes my and my family.

My simple question is what kind of compensation for the individual are proposed. Because from this what I have read there is nothing specific.

The noise is already horrible ( sine I move here it's just getting worse) , air pollution ( visible and noticeable).

I can understand how important it is for the local area and most of all for the investors, but this is not in my best interest.

I am waiting for any sensible response and proposals.
