

I live in the Hamlet of Pepperstock which is both just off Junction 10 of the M1 and directly below the takeoff flightpath towards the Luton direction.

I wish to OBJECT to the Luton Rising expansion plans:

- a) Because the M1 entry at Junction 10 is frequently jammed with traffic going South.
- b) The traffic is frequently at a standstill at Junction 10 going North because the road narrows around Junction 11 and the traffic backs up all the way past Junction 10.
- c) I understand that there is currently a restriction to any flights taking off before 6.00am but this is often ignored with flights leaving earlier.
- d) As well as existing noise, we also suffer from aircraft engine emissions which coat the windscreens of our cars with a greasy coating. This continues to get worse as the number of flights increases.
- e) The damaging effect of an increase in take off noise affects our hearing of speech and tv when we have our windows open during Summer as well as often in Spring and Autumn.
- f) The current scheme for noise mitigation in nearby homes does not extend far enough from the airport, and is anyway inadequate.
