

FSB are pleased to see that due consideration has been applied to the environmental aspects of the proposed expansion through the use of green controls to growth showing economic development can work alongside protecting natural assets. As the airport as a whole is both the largest employer and buyer in the town our members have repeatedly advised how important it is for the local business economy. By setting an example through using faster payments throughout the supply chain, providing opportunities to the wider community through training and supporting local organisations, CICs and charities the proposals show how local business growth would be supported.
