Subject: Planning Application for Luton Airport expansion
Date: 23 August 2024 15:27:34

You don't often get email from [REDACTED]@gmail.com. [Learn why this is important](#)

Good afternoon,

Thank you for the opportunity to express opinions on the planned expansion of London Luton Airport.

I am sure like many submissions, I would like to express my concerns regarding the scale of the proposed development, especially in relation to the following:

Massive increase in the use of carbon fuels that will sit within the planned development, in terms of:

The construction phase, in its entirety of the proposal from outset to completion

The vastly increased amounts of road and rail transport associated with the increased passenger numbers and associated staffing levels

The increase in use of fossil fuels for the proposed increase in flights.

Alongside this would be huge implications for pollution and public health, in terms of:

Increased air pollution

Increased noise pollution

Loss of natural spaces and the mitigation these provide not only in limiting pollution but increasing physical and mental health.

Loss of long term and established environments destroyed by the proposed development

Adverse implications for local residents:

Loss of quality of life

Long term implications of the extent of the development and the unknown implications it would potentially have.

Huge impact on infrastructure locally.

Thank you for taking these into consideration, however poorly expressed.

Mark Welch
