lutonairport@planninginspectorate.gov.uk

We write to OBJECT to the proposed expansion of Luton airport.

The proposed expansion would compound the already adverse effect on Sandon residents following the imposition of the proposed AD6 Airspace change.

AD6 was pushed through during COVID and it is wrong to claim as Luton does that the change was made after "extensive public consultation" (press release 11th July 2024 [REDACTED]).

In practical terms for many Sandon residents AD6 means a step change up in noise pollution with scant consideration for the fact that the base level of noise in a rural village such as Sandon is very low and so the delta in noise or true noise pollution is very substantial for Sandon residents. We would argue that the measurement of noise pollution needs to be much more granular than the current metrics to take this into account.

The Parish of Sandon is within North Hertfordshire and we note that North Hertfordshire Council OBJECTS to both the expansion and the current design of AD6.

We respectfully ask you to take our views into account.

Yours Sincerely

[REDACTED]

Caroline Scott, Clerk

On behalf of Sandon Parish Council
