To Planning

I object to Luton airport being expanded. The noise and air pollution is excessive for the people living in the town. The aeroplanes go over too many houses schools parks and places of work.

An example of the black pollution deposited on paving at our property.

The pollution is from the aircraft and the increased cars on the road. The town has traffic problems caused by excessive traffic.

We are a town committed to being carbon neutral by 2040. The increase in aircraft traffic will not help this. We need to fly less not more.

The countries people travel to for holidays will become too hot to visit so no need to fly.

We need to help the world fight climate change fly less not more!

Hoping you will listen to common sense from a concerned Luton resident who has lived in Luton for 65 years.
