You don't often get email from [REDACTED]

To whom it may concern,

I strongly oppose the expansion of the airport as I am a resident on [REDACTED] who is deeply impacted by the planes flowing low over my home before reaching the runway. During the summer the house literally roared with noise if the windows were open, I had to close them. I couldn't sleep at night because again, if a window was open the noise was too immense. Simple things like opening a door' window, enjoying the garden are adversely impacted already by the flight path.

The planes are too noisy! Surely a route that doesn't involve going low over the houses could be implemented, especially for the bigger planes (Ryanair, Wizzair, Easyjet).

The noise insulation scheme is not the only remedy to address the noise concern. We shouldn't have to live like prisoners 24/7 without being able to have a window or door open.

The planes are simply too loud and the route needs to change.

Kind Regards

Natalie
