MAN-145

I disagree having any sort of airport, here in Thanet. With cargo planes the noise would be unbearable and non-stop, with the amount they are proposing to fly. The fumes and gases would be really harmful, the upside our hospitals getting more patients with breathing and chest complaints.

<sup>We</sup> need houses, schools, shops, hospitals and so much more that would bring money into the area, which both, are sorely needed. Not noisy planes which only would be good for the airport owners. America is a huge country where they need cargo planes more than us, so why not stay there. All the people in the past, who have tried to make Manston a success, failed, doesn't that tell you something. As for buying Jen-tex, that was kept quiet, but very crafty. Trying to come in through the back door are they? Shows they are sly and under hand, can't be trusted.

Go Away, we don't want the likes on you
