

TR020002 - Manston Airport

Ref: 20014051

Submission to the Planning Inspectorate National Service from Rupert and Nicola Allason, residents of [REDACTED]

We respectfully submit that the Applicants have failed to address the issue of fuel tankers required to service the anticipated 20,000 flights a year declared in their documents. Manston has no fuel pipeline so all supplies must be brought in by tanker vehicles, up to four of which are required to fill a Boeing 747.

Accordingly, we submit that quite apart from the additional road traffic generated by the Applicant's plans, there would be a necessity to transport the required fuel by road, thereby increasing congestion, pollution and the risk of accidents.

We have raised this issue at two public consultations, and on both occasions were told that a reply, detailing the projected figures, would be sent to us by email. Despite reminders, no response has been forthcoming.

Rupert & Nicola Allason
