Thanet has been called the "[REDACTED] end of Kent" by a member of KCC (Kent County Council). To a certain extent this is true, but mainly because we are overlooked in almost

every way by KCC and government. We have a large population of life time residents, new incomers to the district and resettled immigrants. We appear to be the first choice for London, and other councils, to resettle people they are unable to assist locally to themselves.

We have very little to offer any of these groups by way of employment except for a few months of the year during the tourist season.

We now have the opportunity of being able to offer a future to these various groups of people, including our children, who at present find it almost impossible to find work....Manston as an Airport with direct work and related work which would be the making of Thanet. We will be able to contribute to the economy of not only Thanet but the whole of the U.K.

Manston as a housing estate (or a lorry park)will just add to the problems we currently have in Thanet and would be the end of any chance to pull ourselves out of the mire we are in at present.

I understand that you need proof of any submissions.....I believe the proof is in looking at other areas such as Heathrow, Gatwick, Luton etc. etc and many other regional airports which, by their presence, create a thriving and vibrant economy within their localities.

RSP, and others, have confirmed to PINS the amount of investment input envisaged in order for Manston Airport to become a major economic success. This is our chance to become a thriving area and once lost and the airport demolished, the chance will never be there again.
