To whom it may concern

As i understand it the then company Annex Aviation who now are RSP with Tony Freudmann have/are upto all the tricks in the book on getting Manston and then as pre planned from my conversations with Freudmann@co back in 2014 is to 'give the airport a go' then once that fails partner up with the local authorities and build on the northside of Manston land,when i asked about any environmental issues on the land being that it has been an airport since the early part of the 20th century i was informed that these environmental problems are in hand and he has them covered.

I met all sorts of strange people through Freudmann and sir Roger Gale while in negotiations with Freudmann@co that led to a pre private contract which i never signed which I've attached for your attention.

Regards Paul e Fay
