Dear PINS

Re-scheduled Examination Hearing Programme

Matthew Birkinshaw BA(Hons) Msc MRTPI Victoria Lucas LLB MCD MRTPI Inspectors
appointed by the Secretary of State

Date: 17 May 2019

Those Inspectors have their toes in the same toxic water supply now as you

They called for report from Southern Water (SEE their evasive FOI response to my FOI
already provided to you) and from Thanet District Council on the quality of water supply

The facts remain that there is an unaddressed Firefighting foam residue hazard at
Manston. Remediation may have to include excavation of an area and replacement of
runway and any metal touched by the foam

TDC has still not come up with figures for initial toxic loading at Manston (Or at Pegwell or
Westwood)

TDC has still not complied with the statutory duties to report environmental hazards to
health to the CCG>

The greatest health inequality upon Thanet is it is denied Article 11 Rights to a safeguarded
safe water supply.

Local Labour seems to be promoting an idea Thanet highest rates of ill health in Kent are
due to social deprivation. But a glance at the CCG stats shows there must be other
reasons. The 3 GP practices with worst ill health stats across the spectrum are Garlinge
area Summerhill Ramsgate and Northdown Cliftonville. Which seem to be fairly stable
non transient areas. IE The risk seems to lay with being born in Thanet with Thanet
parents ??

Kind regards Richard

pendent Examination of the Thanet Local Plan
scheduled Examination Hearing Programme
