Dear Sirs

Following the latest session of Issue Specific Hearings I would like to submit the following comments and questions.

Why is the application still asking for a quota count of 3028 if there are no scheduled arrivals and departures between the hours of 11pm and 6am?

If this means that the quota count is to be used between 6am and 7am, how does that translate to the number of ATM's? Would there even be the physical capacity to use up the entire QC? Or else does it imply that there will be plenty of unscheduled arrivals during the 11pm - 6am period in order to justify such a high QC?

London City Airport offers noise mitigation to residents starting at 57dB Leq16 whereas the applicant is restricting Ramsgate residents to mitigation/compensation starting at 63dB Leq16. What is the reasoning behind this?

I look forward to the ExA putting forward these queries to the applicant.

Yours sincerely

Ms H Frencken
