Dear Sirs,

I was hoping that you might be able to clarify something for me regarding the night flights.

I believe that RiverOak strategic Partnerships are asking for a quota count of over 2,000. However, I thought that the quota count was only needed for night flights.

I must confess that I am a little confused, if RiverOak Strategic Partnerships really don't want night flights which is what they have been saying, then why is a quota count necessary. It just doesn't make sense.

I would be very grateful if you could please confirm the above contradiction.

Kind regards,

Sarah Duncan
