III that.

We same probably one of the neutral houses to the Manuton Airport site and would like to object most strongly to the RSP proposal on the grounds that we would be untable to continue living here with the levels of noise and pollution such a development would cause. The noise and drift of aviation pollution is too close to allow human habitation and will be determinent to health for one only use but the water community.

We have 20 years of perfectives or injurie training or one assure asynow that the stresses of night flights cause serieson problems with a step patterns.

As a time of imagending lood warming this proposal is the last thing we need for the planet and this community.

kind regards

AJ and DE Statham
