Please accept this email in Support for RSPs DCO to retain Manston Airport in Thanet for aviation use
Given the need in the country for more freight cargo as required by other main Airports
And that Manston is in situ already with the runway and area to accommodate cargo and Passenger flights thus
relieving the other main Airports
Thanet needs employment and purpose as it is known for

I'm not sure The amount of HGVs that would use the main road would be that much different from now with
the amount that's using them to n from Dover
Especially at times the Ferry / leshuttle are un operational
I'm all for using what's there .. And would rather use a Airport for that purpose

There is a large scale building development through out the country
As per the local plan
With new communities following all will need providing for including
Imports and exports

And on a note of national security extra runways would always be quite useful

I'm a resident of Thanet and understand the logistics of personal travel throughout the area for living and
working requirements and I feel would that be reduced by the huge projected influx of private vehicles = should
the DCO not be granted and the Land was redeveloped into another giant housing estate .. And actually use
more of the earths resources than maybe the Airport
And require far more services than could be provided

So please accept my support for RSP
Thank you J.K.Rainey
