Please be advised that I am a resident of Ramsgate who lives under the flight path to Manston.

I would dearly love to see the airport reopen which would give us badly needed employment opportunities across the Isle of Thanet. I was born and raised in Thanet and the airport has always been there in times of peace and war since WW1. Re-generation could only be good for Thanet as we are one of the most deprived areas of the UK. Apart from the eventual job opportunities when the airport re-opens, there would also be all the employment on the construction site prior to reopening. We are going to have Manston Parkway Station soon which makes us a very short journey from London and gives us much better access to the mainline railway services. Plus we are only about an hour and a half from London by road.

Please help us to get Thanet back on its feet and give us those much needed jobs and some hope for the future instead of the despair that a lot of Thanet is feeling.

Regards

John Matthews

Please be advised that I am still concerned about Manston not being re-opened. As I said in a previous email I am a resident of Ramsgate who lives at the end of the runway to Manston.

I have lived in Thanet all my life and grew up with a fully operational airport which has never been a problem.

Now is the time we need to get the airport open again as we are in dire straits as far as the lack of employment in the area is concerned. My grandchildren are growing up in this area and there will be no employment for them when they are grown up as this is a recognised social and employment deprived area.

Please let us re-open our airport and bring some hope to the people of Thanet who need employment, and the benefits this could bring to a deprived area
