It takes courage to look to the future and have faith that Manston Airport has a massive part to play towards the future of this country.

And those who have courage knew those with none would head for the high court to try to wreck the future of Manston airport as an airport even though they themselves would never give up flying of on there holidays or using the goods flown in by the aircraft there so against.

The Secretary of State got it right first time round and I support the wise decision he came to. I am 100% behind RSP plans for Manston.

Yours sincerely.

Mr Lee
