Please save Manston Airport!

My personal opinion is the reopening of Manston Airport as a "green" airport will create a lot of jobs in the area, increase imports and exports to the UK thus reducing the amount of commercial vehicles on our roads, and attract more business to the area.

The idea of creating housing on the site will be completely idiotic. There are not enough doctors, dentists, hospitals, schools for the residents of Thanet at present so increasing the population would make it virtually impossible to register; actually, it's virtually impossible now. There are enough new housing sites in the Thanet area already (which are completely unaffordable to residents), and adding more will be pointless unless there is a covert plan to cover the whole of Thanet in concrete rabbit hutches, sorry houses.

Please reconsider and reopen Manston Airport for the good of the area and for the rest of the UK.

Thanks for your time.
