We need this airport to create employment long term on site, with new local businesses, in manufacturing, tech and other support facilities. Hopefully to also provide future passenger travel opportunities. We do not need thousands of extra houses crammed into the area creating ghetto environments in an area of high unemployment already. There are no night flights so noise would not be an issue. An upgrade to the rail network to link the airport to the HS1 would also reduce the environmental impact of heavy goods vehicles transporting freight.

Local full time employment must be a priority.

Kevin & Brenda Spencer and family
