Dear Sirs,

Being a local resident to the airport and having moved into my first home with my wife under the flight path in 2013 when the airport was still operational, I am fully in support for the airport and believe the right decision would be to grant the DCO.

I was personally bitterly disappointed when the airport closed, not only due to my own passion for aviation but because Manston is Thanet, it's at the heart of the area and with Riveroaks proposals I feel it could bring so much to not only the local area but the wider country. Especially with what has happened with the pandemic there is a need for secure jobs and prospects for the future generations who have been hit hardest by this pandemic.

I understand there is the environmental impact on opening the airport however Riveroaks own plans show how environmentally friendly their proposals are and there is a real opportunity for a green airport.

Manston has the ability to become a world leading airport if it's given the chance with the right backing from the top down, something which hasn't been the case until Riveroak.

I support Riveroaks plans and support the regeneration of Thanet and the airport.

Mr M King
