---

Dear sir / Madam

Please accept this as  
positive points in support of Manston  
airport In Thanet  
Not forgetting it's position one Kent as it was  
used for the protection of England when was was a threat  
Of invasion and wars  
And is memorial to those who served and lost there lives doing so

But the Future of Thanet is just as important  
With the investment from Riveroak Strategic Partners and there support  
For best energy including Electric & hydrogen to help with climate control

The site to recycle planes that still have parts to give the next generation of flight  
And to be reused into other industries

The site is suited for the purpose of Aviation  
and yet still provides areas for wild life  
Even so much of there habit is being removed to provide housing  
Leading to the Employment at the Airport  
That is so greatly required  
from Apprentices providing long term employment and the whole range of full and to part time for local  
workforce as well as those wishing to move here because of the Airport  
Please accept my support  
Jayne Rainey
