I write this to try to save one of the most beautiful parts of England from total devastation. At present we are being shafted by the most uncaring, greedy, selfish council that Ramsgate has ever had. We have the most beautiful harbour, The only Royal Harbour, and the promise of a huge investment of £300m to totally rejuvenate our airport, which was cruelly taken away by a greedy, selfish individual.

What is required now is this investment to be allowed to build the airport, using the most modern & most environmental products possible. With this will come thousands of not only jobs, but careers relating not only to the aviation industry, but many allied industries including education, training, & many more. This one decision will transform many lives for the better giving them prosperity, hope ambition & a far greater outlook than the negativity that we see all around us now. Many thanks Phil Hunt

I would ask that you allow the re-opening of Manston Airport as soon as possible. I live on the flight path at [REDACTED] Estate & miss the planes flying over my house. Manston opening will be a huge catalyst for progress & hope in this deprived & forgotten corner of Kent.

With the high quality jobs, infrastructure investment & education facilities on offer due to the investment of £300m this could change many lives for the better. When passenger flights resume, both nationally & internationally, the airports that are currently taking cargo will not have the space or slots to do so & with the increase in cargo volumes due to the increase in trade with countries because of Brexit, further airport capacity will be required. At Manston we have a ready made runway & a company prepared to make it the greenest & most up to date airport in the World with the airport being built using solar, electrical & hydrogen technology. There will be no night flights & with an e-commerce & air cargo demand that won't go away let us lead the World in this technology. This is a win win situation & I hope you will look favourably to improve, not only our lives in Thanet, but Kent and the rest of the country. Kind regards Phil Hunt
